(1) Indexes from February 1978 are subject to revision. — Les indices à compter de février 1978 sont sujets à révision.

(2) Gross weighted, including inter-industry shipments. For explanation see page 81.— Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 81.

(3) The available indexes for this industry are presently based on 'list' prices and may not be a reflection of actual transaction prices. Work is currently underway to replace these 'list' prices with actual transaction prices. When completed in the near future, all series for this industry will be revised starting from February 1977. Additional regional detail for commodities will become public at the same time. The major group and total manufacturing indexes

(1) Indexes from February 1978 are subject to revision. - Les indices à compter de février 1978 sont sujets à révision.

(2) Composed of Iron Products and Non-ferrous metals groups from the General Wholesale Index, covering raw and partly as well as fully and chiefly manufactured goods. - Renferme les produits du fer et les groupes de métaux non ferreux de l'indice général de gros, comprenant des matières premières et des produits partiellement ou entièrement fabriqués et les produits destinés principalement à la fabrication.

(3) The weighted average of these two series is the total General Wholesale Index. - La moyenne pondérée de ces deux séries représente tout l'indice général de gros.

(4) Excludes metals in the form of pig, ingot, scrap, cast and electrolytic. - Ne comprend pas les métaux sous forme de gueuses, lingots, ferraille, et moulages et les métaux électrolytiques.

(5) Includes rolled and formed products such as sheets, plates and pipes. - Comprend les produits laminés et façonnés comme les feuilles, les plaques et les tuyaux.

(6) Includes vegetable and animal products groups, less hay, rubber, tobacco, furs, hides and skins, leather and footwear. - Comprend les groupes de produits d'origine végétale et animale moins le foin, le caoutchouc, le tabac, les fourrures, les peaux, le cuir et les chaussures.

(7) All items except vegetable and animal products groups. - Tous les articles moins les groupes de produits d'origine végétale et animale.

(1) With the revision of the Farm Input Price Index to a 1971=100 base, the source of feed prices has been changed. The Canadian Livestock Feed Board now provides the price data; to supplement this information, we now publish price indexes (1971=100) instead of average prices. — La source des prix des provendes a été changée avec l'introduction de la révision de l'indice des prix des entrées dans l'agriculture sur la base de 1971=100. Les prix proviennent maintenant de l'office canadien des provendes. Nous publions maintenant des indices de prix (1971=100) au lieu de prix moyens comme complément à cette information.

EXPLANATION OF METHODS USED AND ADDITIONAL
SOURCES FOR INDUSTRIAL PRICE INDEXES

Industry Selling Price Indexes
(1971=100)

Industry selling price indexes are published for approximately 110 industries within manufacturing. Also published are approximately 700 commodity price indexes for the products of these industries. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction data for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry selling price indexes: manufacturing 1956-1976, Catalogue 62-543 for the 1971=100 based indexes.

General Wholesale Index
(1935-1939=100)

The general wholesale index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES
SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indices des prix de vente dans l'industrie
(1971=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Près de 700 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices figure dans l'industrie: industries manufacturières, 1956-1976 n° 62-543 au catalogue pour les indices basés sur l'année repère 1971=100.

Indice général des prix de gros
(1935-1939=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène

broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except insofar as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Volume 23) (Catalogue 62-501).

Thirty Industrial Materials (1935-1939=100)

The price index of 30 industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{p_{tN}^1 \times p_{tN}^2 \times p_{tN}^3 \times \dots \times p_{tN}^{30}}$$

30

de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (volume 23) (n° 62-501 au catalogue).

Indice des prix de 30 matières industrielles (1935-1939=100)

L'indice des prix de 30 matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering five and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyres type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

Purchase Price Indexes of
Industrial Materials

Secondary Metals (1971=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Thermal Coal Purchase Price Index
(1971=100)

This index on a 1971=100 base is the result of a renewed demand for coal because of an anticipated shortage in energy supplies. The index for coal is a purchase price index determined by surveying electric utilities, the major users of bituminous coal. It includes purchase prices for both domestic and imported United States coal. Prices are the amount the utilities pay to suppliers, excluding federal and provincial taxes and freight rates. The weights in this index are derived from the base year purchase prices provided by the firms.

The "Thermal Coal Purchase Price Index" is calculated using the modified Laspeyres' fixed weight formula:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Where

$P_{t/o}$ is the price index (expressed as a percentage) which compares prices of the given year t with those of the base year o (1956, 1961 and 1971 respectively),

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables" (12 matières), prix des aliments (cinq matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérés comme intrants importants dans l'industrie.

Indices du prix d'achat des
matériaux industriels

Métaux secondaires (1971=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la Statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice du prix d'achat du charbon thermique
(1971=100)

Cet indice de base 1971=100 a été établi à la suite d'une nouvelle demande de charbon à cause d'une pénurie prévue en ressources énergétiques. L'indice du charbon est un indice du prix d'achat payé par les services publics d'électricité, principaux utilisateurs de charbon bitumineux. Il comprend à la fois le prix d'achat du charbon domestique et du charbon importé des États-Unis. Les prix sont ceux payés aux fournisseurs, sans les taxes fédérales et provinciales et les taux de fret. Les coefficients de pondération sont calculés à partir du prix d'achat de l'année de base fournis par les entreprises.

L'indice du prix d'achat du charbon thermique" est établi à l'aide de l'équation modifiée de Laspeyres à pondération fixe:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Où

$P_{t/o}$ est l'indice (exprimé en pourcentage) des prix d'une année donnée t sur ceux de l'année de base o (1956, 1961 et 1971 respectivement),

Σ is the sign indicating the summation over all items contained in the index,

P_t is the price of a particular item in the given period t.

P_o is the price of a particular item in the base year o.

V_o is the fixed weight of a particular item in the base year o.

$\frac{P_t}{P_o}$ is the price ratio for a particular item(1) (expressed as a percentage) between the given period t and the base year o.

Σ est le symbole qui indique la somme de tous les articles de l'indice,

P_t est le prix d'un article particulier pendant la période donnée t,

P_o est le prix d'un article particulier pendant l'année de base o,

V_o est le coefficient de pondération fixe d'un article particulier pendant l'année de base o

$\frac{P_t}{P_o}$ est le rapport (exprimé en pourcentage) du prix d'un article particulier(1) entre la période donnée t et l'année de base o.

Indexes for establishment and provincial levels cannot be published because of the confidentiality of the data under the Statistics Act.

Les indices aux niveaux de l'établissement et de la province ne peuvent être publiés puisque la confidentialité des données doit être assurée en vertu de la Loi sur la statistique.

Canadian Farm Products Price Index (1971=100)

This index on a 1971=100 base is an up-dated version of that previously published on a 1935-1939=100 base. The weighting system is derived from the 1971 Farm Cash Receipts as collected by the Agriculture Division of Statistics Canada. The receipts measure the value of farm production less inter-farm payments and income-in-kind. Prices are obtained from terminal markets.

The Canadian Wheat Board announced final payments for the crop year 1976-77 on January 5, 1978 and the index includes them. The estimates for the total payments for 1977-78 are the initial payments plus a half of the 1976-77 crop year payments.

The indexes for 1978-79 are based on initial payments only.

Indice des prix des produits agricoles canadiens (1971=100)

Cet indice, qui se fonde sur l'année de base (1971=100) constitue une mise à jour de l'indice antérieur établi sur la base 1935-1939=100. Le système de pondération est tiré des recettes monétaires agricoles de 1971 qui ont été recueillies par la Division de l'agriculture de Statistique Canada. Ces recettes indiquent la valeur de la production agricole moins les paiements entre agriculteurs et les revenus en nature. Les prix proviennent des marchés terminaux.

La Commission canadienne du blé a annoncé les paiements finals de l'année de récolte 1976-77 le 5 janvier 1978 et l'indice en tient compte. Les estimés des paiements totaux pour 1977-78 couvrent les paiements initiaux et la moitié des paiements de l'année de récolte 1976-77.

Les indices pour 1978-79 sont basés sur le premier paiement seulement.

Unit — Unité	Initial and total participation payments 1976-77, 1977-78, 1978-79 — Paielements initiaux et ensemble des paiements de participation 1976-77, 1977-78, 1978-79

Security Price Indexes (1971=100)

Revised security price indexes on the base 1971=100 were presented for the first time in the May 1975 issue of Catalogue 62-002. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily

Indices des cours des valeurs mobilières (1971=100)

Les indices révisés des cours des valeurs mobilières sur la base 1971=100 ont été présentés pour la première fois dans le n° 62-002 au catalogue, mai 1975. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1^{er} janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de

closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-74.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

For the list of stocks currently included in the indexes, see the special supplement in the May 1975 issue of Prices and Price Indexes (Catalogue 62-002).

Price Indexes of Machinery and Equipment (1968=100)

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-74.

Les actions faisant partie des indices sont classées selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Pour la liste des actions habituellement comprises dans les indices, consulter le supplément spécial dans l'édition de mai 1975 de la publication Prix et indices des prix (no 62-002 au catalogue).

Indices des prix des machines et du matériel (1968=100)

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminée pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Electric Power Selling Price
Indexes (Non-Residential)

1. Brief Description

The Electric Power Selling Price Indexes are designed to measure "pure" price change at the producers' level, i.e., at the "factory gate". Since the industry's transmission lines are considered as part of the producer's operation, the "factory gate" in this index is at the user's end. These indexes are part of a larger system of indexes known as the Industry Selling Price Indexes and conform to the underlying concepts as described in reference document, Catalogue 62-543.

Industry Selling Price Indexes are a measure of pure price change of specified commodities having a fixed time and weight base of 1971=100. Prices are f.o.b. factory gate less discounts and before taxes. The 1971 Gross Shipment Values are gathered by the Census of Manufacturers. In the case of Electric Power Selling Price Indexes, weights are based on the 1971 revenue from electricity sales gathered by Prices Division.

The Electric Power Selling Price Index series is published in two broad customer categories of sales, (1) an index for bills less than 5000 kw. and (2) an index for large industrial sales, bills or contracts 5000 kw. and over. Data are presented from 1971 onward, on a monthly basis. Only firm (non-interruptible) power is being surveyed. Interruptible and off-peak power price movement is not included in this index. The survey methodology is described under each of the two broad customer categories.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de vente de l'énergie
électrique (non résidentielle)

1. Brève description

Les indices des prix de vente de l'énergie électrique visent à mesurer la variation de prix "pure" au niveau de la production, c'est-à-dire, au "départ de l'usine". Étant donné que les lignes de transport de l'entreprise font ici partie de l'exploitation du producteur, le présent indice prend comme point de "départ de l'usine" l'entrée chez l'utilisateur. Ces indices appartiennent à un plus grand système d'indices appelé Indices de prix de vente dans l'industrie et s'appuient sur les concepts décrits dans le document de référence qui doit paraître bientôt (n° 62-543 au catalogue).

Les indices de prix de vente dans l'industrie mesurent la variation de prix pure de certains produits ayant une base fixe de période et de pondération (1971=100). Il s'agit des prix f.o.b. départ usine moins les remises et avant impôt. Les valeurs des livraisons brutes sont recueillies par le recensement des manufactures. Dans le cas de l'indice des prix de vente de l'énergie électrique, les pondérations sont basées sur les recettes au titre des ventes de 1971, dont les données ont été recueillies par la Division des prix.

L'indice des prix de vente de l'énergie électrique paraît pour deux grandes catégories de ventes selon le client, à savoir: (1) un indice pour les factures de moins de 5000 kW et (2) un indice pour les ventes, factures ou contrats industriels de 5000 kW et plus. Nous publions ces données chaque mois depuis 1971. Seule l'énergie garantie, non susceptible d'être interrompue fait l'objet du relevé, les mouvements de prix de l'énergie susceptible d'être interrompue et de l'énergie des heures creuses n'étant pas compris dans l'indice. Les méthodes d'enquête figurent sous chacune des deux grandes catégories.

Whenever specification changes occur thereby altering the quality of the item being priced, quality change evaluations are made to ascertain only pure price change since the commodity characteristics must remain constant in order to measure pure price change over a given period of time, using Laspeyres formula as follows:

$$Pt/o = \frac{\sum \frac{Pt \times Vo}{Po}}{\sum Vo} \times 100$$

Pt/o = index for year t

Pt = price of an item in the given period

Po = price of an item in year o, the base year

Vo = weight of an item in the base period

Pt/Po = is the price ratio for a particular item.

2. Methodology

(a) Bills Less Than 5000 kw.

In this category a "representative bill" was selected subjectively through examination of the bills in each of the municipalities drawn in our provincial samples. Some 120 municipalities were surveyed in the sample and the municipalities selected represent a good coverage of each province in terms of sales. The representative bill was established and its kw. demand and kwh. consumption specifications will be held constant until it is found, on periodic review, that the bill is no longer representative of the monthly bills in that municipality. When this occurs a new representative bill will be selected and its price "spliced in" to the original bill to maintain the continuity of the index. Larger municipalities may have more than one representative bill where several significant groupings of bills have been identified. All provinces are included in the survey.

(b) Bills 5000 kw. and Over

This customer category presented problems in sampling. The category is composed of customers whose contract prices do not necessarily move as a family of curves. In many cases larger contracts are given a different price adjustment by utilities, than the lesser ones. In order to eliminate this sampling problem, a stratified sampling technique was used whereby homogeneous

Toutes les fois qu'il se produit une variation de la qualité du produit relevé, on procède à une évaluation de la variation de la qualité afin de s'assurer que seule la variation de prix pure est prise en compte, puisque les caractéristiques du produit doivent demeurer constantes si l'on veut mesurer une variation de prix pure sur une période donnée. On se sert de Laspeyres de la façon suivante:

$$Pt/o = \frac{\sum \frac{Pt \times Vo}{Po}}{\sum Vo} \times 100$$

Pt/o = indice pour l'année "t"

Pt = prix d'un article particulier pendant une période donnée

Po = prix d'un article particulier pendant l'année "o", année de base

Vo = coefficient de pondération d'un article pendant la période de base

Pt/Po = ratio des prix pour un article particulier.

2. Méthodologie

a) Factures de moins de 5000 kW

Dans cette catégorie une "facture représentative" a été choisie subjectivement parmi les factures de chacune des municipalités tirées de nos échantillons provinciaux. Les quelque 120 municipalités de l'échantillon sont représentatives des ventes effectuées dans chaque province. À la facture choisie sont attribuées des caractéristiques, c'est-à-dire la demande en kW et la consommation en KWh, que l'on conserve jusqu'à ce que, après un examen périodique, on estime que la facture ne représente plus le prix mensuel des factures de cette municipalité. Dans ce cas, une nouvelle facture représentative est choisie et son prix est "ajusté" d'après la facture originale pour ne pas créer une discontinuité dans la série. Les grandes municipalités peuvent avoir plus d'une facture représentative lorsque plusieurs groupements de factures ont été établis. Toutes les provinces sont visées par l'enquête.

b) Factures de 5000 kW et plus

Cette catégorie de clients présente certains problèmes d'échantillonnage; elle se compose dans son ensemble de clients pour lesquels les mouvements des prix des contrats ne vont pas nécessairement dans le même sens. Dans de nombreux cas, les gros contrats font l'objet d'un rajustement de prix par service, différent de celui des petits contrats. Afin d'éliminer ce problème, on a utilisé une technique d'échantillonnage stratifié pour établir

groups or strata were established and a representative contract was selected subjectively for each interval or stratum, e.g., 5000-8000 kw., 8001-10,000 kw., 10,001-15,000 kw., 15,001-20,000 kw., and over 20,000 kw. (the specifications used may be theoretical in order to respect the confidentiality of a respondent). Interval boundaries and their representative contracts are held constant through time for each utility. These interval boundaries differ between utilities since each one has a different customer category make-up. The actual index of the "5000 kw. and over" category is a weighted average of the price movements for each interval or stratum within that group. Each interval is weighted according to the utility's revenue from sales for 1971. It is recognized that in the larger utilities the establishment of homogeneous groups of contracts in terms of price movement, especially in the contracts 15,000 kw. and over, may not be possible. Consequently, as an alternative, utilities may calculate a weighted average unit price in each of the intervals of strata that are not homogeneous and apply this price movement to a theoretical representative contract. In this way distortions will be minimized and at the total index levels will be averaged out.

des groupes ou strates homogènes et choisir subjectivement un contrat représentatif (dont les caractéristiques peuvent être "théoriques" de façon à garder secrets les chiffres d'un enquête) pour chaque intervalle ou strate, par ex., 5000-8000 kW, 8001-10,000 kW, 10,001-15,000 kW, 15,001-20,000 kW et plus de 20,000 kW. Ces limites et leurs contrats représentatifs sont tenus constants dans le temps pour chaque service public. Ces limites ne sont pas les mêmes pour chaque service puisque chacun regroupe des clients différents. L'indice réel pour les factures de 5000 kW et plus est une moyenne pondérée des mouvements de prix pour chaque intervalle ou strate de chaque groupe, chaque intervalle étant pondéré selon les recettes de ce service au titre des ventes de 1971. On sait pertinemment que pour les grands services, l'établissement de groupes de contrats homogènes en termes de mouvement de prix, surtout les contrats de 15,000 kW et plus, peut être impossible; par conséquent, comme solution de rechange, les services peuvent calculer un prix unitaire moyen pondéré pour chaque intervalle ou strate non homogène et appliquer cette variation de prix à un contrat représentatif théorique. De la sorte, les distortions seront maintenues à un minimum et s'équilibreront aux niveaux de l'indice total.

3. Individual indexes are calculated for the province, economic region and at the national level for each of the two broad customer categories described above. The five economic regions are as follows: Pacific (British Columbia), Prairie (Alberta, Saskatchewan and Manitoba), Ontario, Québec and Atlantic (Newfoundland, New Brunswick, Prince Edward Island and Nova Scotia).

Users are cautioned that the indexes indicate only price movement variations and should not be interpreted as representative of individual utilities relative price levels.

3. Chaque indice est calculé selon la province, la région économique et le Canada pour chacune des deux grandes catégories de clients décrites ci-haut. Les cinq régions économiques sont: le Pacifique (Colombie-Britannique), les Prairies (Alberta, Saskatchewan et Manitoba), l'Ontario, le Québec, l'Atlantique (Terre-Neuve, Nouveau-Brunswick, île-du-Prince-Édouard et Nouvelle-Écosse).

Les utilisateurs sont priés de noter que les indices rendent compte des variations des mouvements des prix seulement et qu'il ne faut pas les considérer comme représentatifs des niveaux relatifs des prix des divers services.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

CANSIM[®] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data which is not included in this publication are available from CANSIM.

Table 1 (i.e., Industry Selling Price Indexes by Major Groups, Industries and Selected Commodities) includes the identification codes required to order series from CANSIM. For example, to obtain the Industry Selling Price Index: Manufacturing, the code used is D 500000.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8 or call (613) 995-7406.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombre indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

Le CANSIM[®] (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissaient pas dans cette publication sont disponibles de CANSIM.

Le Tableau 1 (Indice des prix de vente dans l'industrie par groupes, industries et par certains produits) contient les numéros d'identification qui servent à l'extraction des données de CANSIM. Par exemple, pour obtenir l'Indice de prix de vente dans l'industrie: industries manufacturières, le numéro d'identification est D 500000.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

(1) Indexes from March 1978 are subject to revision. — Les indices à compter de mars 1978 sont sujets à révision.

(2) Gross weighted, including inter-industry shipments. For explanation see page 81. — Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 81.

(3) The available indexes for this industry are presently based on 'list' prices and may not be a reflection of actual transaction prices. Work is currently underway to replace these 'list' prices with actual transaction prices. When completed in the near future, all series for this industry will be revised starting from February 1977. Additional regional detail for commodities will become public at the same time. The major group and total manufacturing indexes will also be revised from February 1977 to reflect the changes in the industry series. To prevent misinterpretation of series as now published, index values from February 1977 forwards have been suppressed. — Les indices disponibles pour cette industrie sont présentement basés sur les prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction. On travaille présentement à remplacer ces prix de détail suggérés par des prix réels à la transaction. Bientôt, lorsque ce travail sera complété, toutes les séries pour cette industrie seront révisées à partir de février 1977. Des informations régionales sur les biens plus détaillées seront publiées en même temps. Les indices pour le groupe principal et le groupe total du secteur manufacturier seront également révisés à compter de février 1977 pour tenir compte des changements dans les séries des industries. Les indices à compter de février 1977 ont été supprimés pour éviter toute fausse interprétation des séries publiées jusqu'à maintenant.

(4) Only British Columbia prices for both rough and planed hemlock are included. — Seuls les prix de Colombie-Britannique du pruche à l'état brut et plané sont inclus.

(1) Indexes from March 1978 are subject to revision. – Les indices à compter de mars 1978 sont sujets à révision.

(2) Composed of Iron Products and Non-ferrous metals groups from the General Wholesale Index, covering raw and partly as well as fully and chiefly manufactured goods. – Renferme les produits du fer et les groupes de métaux non ferreux de l'indice général de gros, comprenant des matières premières et des produits partiellement ou entièrement fabriqués et les produits destinés principalement à la fabrication.

(3) The weighted average of these two series is the total General Wholesale Index. – La moyenne pondérée de ces deux séries représente tout l'indice général de gros.

(4) Excludes metals in the form of pig, ingot, scrap, cast and electrolytic. – Ne comprend pas les métaux sous forme de gueuses, lingots, ferraille, et moulages et les métaux électrolytiques.

(5) Includes rolled and formed products such as sheets, plates and pipes. – Comprend les produits laminés et façonnés comme les feuilles, les plaques et les tuyaux.

(6) Includes vegetable and animal products groups, less hay, rubber, tobacco, furs, hides and skins, leather and footwear. – Comprend les groupes de produits d'origine végétale et animale moins le foin, le caoutchouc, le tabac, les fourrures, les peaux, le cuir et les chaussures.

(7) All items except vegetable and animal products groups. – Tous les articles moins les groupes de produits d'origine végétale et animale.

(1) With the revision of the Farm Input Price Index to a 1971=100 base, the source of feed prices has been changed. The Canadian Livestock Feed Board now provides the price data; to supplement this information, we now publish price indexes (1971=100) instead of average prices. — La source des prix des provendes a été changée avec l'introduction de la révision de l'indice des prix des entrées dans l'agriculture sur la base de 1971=100. Les prix proviennent maintenant de l'office canadien des provendes. Nous publions maintenant des indices de prix (1971=100) au lieu de prix moyens comme complément à cette information.

(1) Monthly prices are collected and processed three times per annum. With the release of the most current four-months indexes, indexes for the previous four-month span are revised and finalized. — Des prix mensuels sont relevés et calculés trois fois par année. Avec l'émission des indices les plus récents portant sur quatre mois, les indices pour la période de quatre mois précédents sont révisés et finalisés.

EXPLANATION OF METHODS USED AND ADDITIONAL
SOURCES FOR INDUSTRIAL PRICE INDEXES

Industry Selling Price Indexes
(1971=100)

Industry selling price indexes are published for approximately 110 industries within manufacturing. Also published are approximately 700 commodity price indexes for the products of these industries. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction data for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry selling price indexes: manufacturing 1956-1976, Catalogue 62-543 for the 1971=100 based indexes.

General Wholesale Index
(1935-1939=100)

The general wholesale index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES
SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indices des prix de vente dans l'industrie
(1971=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Près de 700 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices figure dans l'industrie: industries manufacturières, 1956-1976 n° 62-543 au catalogue pour les indices basés sur l'année repère 1971=100.

Indice général des prix de gros
(1935-1939=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène

broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except insofar as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Volume 23) (Catalogue 62-501).

Thirty Industrial Materials (1935-1939=100)

The price index of 30 industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{p_{tN}^1 \times p_{tN}^2 \times p_{tN}^3 \times \dots \times p_{tN}^{30}}$$

30

de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (volume 23) (n° 62-501 au catalogue).

Indice des prix de 30 matières industrielles (1935-1939=100)

L'indice des prix de 30 matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering five and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyres type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

Purchase Price Indexes of
Industrial Materials

Secondary Metals (1971=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Thermal Coal Purchase Price Index
(1971=100)

This index on a 1971=100 base is the result of a renewed demand for coal because of an anticipated shortage in energy supplies. The index for coal is a purchase price index determined by surveying electric utilities, the major users of bituminous coal. It includes purchase prices for both domestic and imported United States coal. Prices are the amount the utilities pay to suppliers, excluding federal and provincial taxes and freight rates. The weights in this index are derived from the base year purchase prices provided by the firms.

The "Thermal Coal Purchase Price Index" is calculated using the modified Laspeyres' fixed weight formula:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Where

$P_{t/o}$ is the price index (expressed as a percentage) which compares prices of the given year t with those of the base year o (1956, 1961 and 1971 respectively),

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables" (12 matières), prix des aliments (cinq matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérés comme intrants importants dans l'industrie.

Indices du prix d'achat des
matériaux industriels

Métaux secondaires (1971=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la Statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice du prix d'achat du charbon thermique
(1971=100)

Cet indice de base 1971=100 a été établi à la suite d'une nouvelle demande de charbon à cause d'une pénurie prévue en ressources énergétiques. L'indice du charbon est un indice du prix d'achat payé par les services publics d'électricité, principaux utilisateurs de charbon bitumieux. Il comprend à la fois le prix d'achat du charbon domestique et du charbon importé des États-Unis. Les prix sont ceux payés aux fournisseurs, sans les taxes fédérales et provinciales et les taux de fret. Les coefficients de pondération sont calculés à partir du prix d'achat de l'année de base fournis par les entreprises.

L'"indice du prix d'achat du charbon thermique" est établi à l'aide de l'équation modifiée de Laspeyres à pondération fixe:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Où

$P_{t/o}$ est l'indice (exprimé en pourcentage) des prix d'une année donnée t sur ceux de l'année de base o (1956, 1961 et 1971 respectivement),

Σ is the sign indicating the summation over all items contained in the index,

P_t is the price of a particular item in the given period t.

P_o is the price of a particular item in the base year o.

V_o is the fixed weight of a particular item in the base year o.

$\frac{P_t}{P_o}$ is the price ratio for a particular item(1) (expressed as a percentage) between the given period t and the base year o.

Indexes for establishment and provincial levels cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1971=100)

This index on a 1971=100 base is an up-dated version of that previously published on a 1935-1939=100 base. The weighting system is derived from the 1971 Farm Cash Receipts as collected by the Agriculture Division of Statistics Canada. The receipts measure the value of farm production less inter-farm payments and income-in-kind. Prices are obtained from terminal markets.

The Canadian Wheat Board announced final payments for the crop year 1976-77 on January 5, 1978 and the index includes them. The estimates for the total payments for 1977-78 are the initial payments plus a half of the 1976-77 crop year payments.

The indexes for 1978-79 are based on initial payments only.

Σ est le symbole qui indique la somme de tous les articles de l'indice,

P_t est le prix d'un article particulier pendant la période donnée t,

P_o est le prix d'un article particulier pendant l'année de base o,

V_o est le coefficient de pondération fixe d'un article particulier pendant l'année de base o,

$\frac{P_t}{P_o}$ est le rapport (exprimé en pourcentage) du prix d'un article particulier(1) entre la période donnée t et l'année de base o.

Les indices aux niveaux de l'établissement et de la province ne peuvent être publiés puisque la confidentialité des données doit être assurée en vertu de la Loi sur la statistique.

Indice des prix des produits agricoles canadiens (1971=100)

Cet indice, qui se fonde sur l'année de base (1971=100) constitue une mise à jour de l'indice antérieur établi sur la base 1935-1939=100. Le système de pondération est tiré des recettes monétaires agricoles de 1971 qui ont été recueillies par la Division de l'agriculture de Statistique Canada. Ces recettes indiquent la valeur de la production agricole moins les paiements entre agriculteurs et les revenus en nature. Les prix proviennent des marchés terminaux.

La Commission canadienne du blé a annoncé les paiements finals de l'année de récolte 1976-77 le 5 janvier 1978 et l'indice en tient compte. Les estimés des paiements totaux pour 1977-78 couvrent les paiements initiaux et la moitié des paiements de l'année de récolte 1976-77.

Les indices pour 1978-79 sont basés sur le premier paiement seulement.

Security Price Indexes (1971=100)

Revised security price indexes on the base 1971=100 were presented for the first time in the May 1975 issue of Catalogue 62-002. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily

Indices des cours des valeurs mobilières (1971=100)

Les indices révisés des cours des valeurs mobilières sur la base 1971=100 ont été présentés pour la première fois dans le n° 62-002 au catalogue, mai 1975. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1^{er} janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de

closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-74.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

For the list of stocks currently included in the indexes, see the special supplement in the May 1975 issue of Prices and Price Indexes (Catalogue 62-002).

Price Indexes of Machinery and Equipment (1968=100)

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-74.

Les actions faisant partie des indices sont classées selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Pour la liste des actions habituellement comprises dans les indices, consulter le supplément spécial dans l'édition de mai 1975 de la publication Prix et indices des prix (no 62-002 au catalogue).

Indices des prix des machines et du matériel (1968=100)

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminée pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Electric Power Selling Price
Indexes (Non-Residential)

1. Brief Description

The Electric Power Selling Price Indexes are designed to measure "pure" price change at the producers' level, i.e., at the "factory gate". Since the industry's transmission lines are considered as part of the producer's operation, the "factory gate" in this index is at the user's end. These indexes are part of a larger system of indexes known as the Industry Selling Price Indexes and conform to the underlying concepts as described in reference document, Catalogue 62-543.

Industry Selling Price Indexes are a measure of pure price change of specified commodities having a fixed time and weight base of 1971=100. Prices are f.o.b. factory gate less discounts and before taxes. The 1971 Gross Shipment Values are gathered by the Census of Manufacturers. In the case of Electric Power Selling Price Indexes, weights are based on the 1971 revenue from electricity sales gathered by Prices Division.

The Electric Power Selling Price Index series is published in two broad customer categories of sales, (1) an index for bills less than 5000 kw. and (2) an index for large industrial sales, bills or contracts 5000 kw. and over. Data are presented from 1971 onward, on a monthly basis. Only firm (non-interruptible) power is being surveyed. Interruptible and off-peak power price movement is not included in this index. The survey methodology is described under each of the two broad customer categories.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de vente de l'énergie
électrique (non résidentielle)

1. Brève description

Les indices des prix de vente de l'énergie électrique visent à mesurer la variation de prix "pure" au niveau de la production, c'est-à-dire, au "départ de l'usine". Étant donné que les lignes de transport de l'entreprise font ici partie de l'exploitation du producteur, le présent indice prend comme point de "départ de l'usine" l'entrée chez l'utilisateur. Ces indices appartiennent à un plus grand système d'indices appelé Indices de prix de vente dans l'industrie et s'appuient sur les concepts décrits dans le document de référence qui doit paraître bientôt (n° 62-543 au catalogue).

Les indices de prix de vente dans l'industrie mesurent la variation de prix pure de certains produits ayant une base fixe de période et de pondération (1971=100). Il s'agit des prix f.o.b. départ usine moins les remises et avant impôt. Les valeurs des livraisons brutes sont recueillies par le recensement des manufactures. Dans le cas de l'indice des prix de vente de l'énergie électrique, les pondérations sont basées sur les recettes au titre des ventes de 1971, dont les données ont été recueillies par la Division des prix.

L'indice des prix de vente de l'énergie électrique paraît pour deux grandes catégories de ventes selon le client, à savoir: (1) un indice pour les factures de moins de 5000 kW et (2) un indice pour les ventes, factures ou contrats industriels de 5000 kW et plus. Nous publions ces données chaque mois depuis 1971. Seule l'énergie garantie, non susceptible d'être interrompue fait l'objet du relevé, les mouvements de prix de l'énergie susceptible d'être interrompue et de l'énergie des heures creuses n'étant pas compris dans l'indice. Les méthodes d'enquête figurent sous chacune des deux grandes catégories.

Whenever specification changes occur thereby altering the quality of the item being priced, quality change evaluations are made to ascertain only pure price change since the commodity characteristics must remain constant in order to measure pure price change over a given period of time, using Laspeyres formula as follows:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = index for year t

Pt = price of an item in the given period

Po = price of an item in year o, the base year

Vo = weight of an item in the base period

Pt/Po = is the price ratio for a particular item.

Toutes les fois qu'il se produit une variation de la qualité du produit relevé, on procède à une évaluation de la variation de la qualité afin de s'assurer que seule la variation de prix pure est prise en compte, puisque les caractéristiques du produit doivent demeurer constantes si l'on veut mesurer une variation de prix pure sur une période donnée. On se sert de Laspeyres de la façon suivante:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = indice pour l'année "t"

Pt = prix d'un article particulier pendant une période donnée

Po = prix d'un article particulier pendant l'année "o", année de base

Vo = coefficient de pondération d'un article pendant la période de base

Pt/Po = ratio des prix pour un article particulier.

2. Methodology

(a) Bills Less Than 5000 kw.

In this category a "representative bill" was selected subjectively through examination of the bills in each of the municipalities drawn in our provincial samples. Some 120 municipalities were surveyed in the sample and the municipalities selected represent a good coverage of each province in terms of sales. The representative bill was established and its kw. demand and kwh. consumption specifications will be held constant until it is found, on periodic review, that the bill is no longer representative of the monthly bills in that municipality. When this occurs a new representative bill will be selected and its price "spliced in" to the original bill to maintain the continuity of the index. Larger municipalities may have more than one representative bill where several significant groupings of bills have been identified. All provinces are included in the survey.

(b) Bills 5000 kw. and Over

This customer category presented problems in sampling. The category is composed of customers whose contract prices do not necessarily move as a family of curves. In many cases larger contracts are given a different price adjustment by utilities, than the lesser ones. In order to eliminate this sampling problem, a stratified sampling technique was used whereby homogeneous

2. Méthodologie

a) Factures de moins de 5000 kW

Dans cette catégorie une "facture représentative" a été choisie subjectivement parmi les factures de chacune des municipalités tirées de nos échantillons provinciaux. Les quelque 120 municipalités de l'échantillon sont représentatives des ventes effectuées dans chaque province. À la facture choisie sont attribuées des caractéristiques, c'est-à-dire la demande en kW et la consommation en KWh, que l'on conserve jusqu'à ce que, après un examen périodique, on estime que la facture ne représente plus le prix mensuel des factures de cette municipalité. Dans ce cas, une nouvelle facture représentative est choisie et son prix est "ajusté" d'après la facture originale pour ne pas créer une discontinuité dans la série. Les grandes municipalités peuvent avoir plus d'une facture représentative lorsque plusieurs groupements de factures ont été établis. Toutes les provinces sont visées par l'enquête.

b) Factures de 5000 kW et plus

Cette catégorie de clients présente certains problèmes d'échantillonnage; elle se compose dans son ensemble de clients pour lesquels les mouvements des prix des contrats ne vont pas nécessairement dans le même sens. Dans de nombreux cas, les gros contrats font l'objet d'un rajustement de prix par service, différent de celui des petits contrats. Afin d'éliminer ce problème, on a utilisé une technique d'échantillonnage stratifié pour établir

groups or strata were established and a representative contract was selected subjectively for each interval or stratum, e.g., 5000-8000 kW., 8001-10,000 kW., 10,001-15,000 kW., 15,001-20,000 kW., and over 20,000 kW. (the specifications used may be theoretical in order to respect the confidentiality of a respondent). Interval boundaries and their representative contracts are held constant through time for each utility. These interval boundaries differ between utilities since each one has a different customer category make-up. The actual index of the "5000 kW. and over" category is a weighted average of the price movements for each interval or stratum within that group. Each interval is weighted according to the utility's revenue from sales for 1971. It is recognized that in the larger utilities the establishment of homogeneous groups of contracts in terms of price movement, especially in the contracts 15,000 kW. and over, may not be possible. Consequently, as an alternative, utilities may calculate a weighted average unit price in each of the intervals of strata that are not homogeneous and apply this price movement to a theoretical representative contract. In this way distortions will be minimized and at the total index levels will be averaged out.

3. Individual indexes are calculated for the province, economic region and at the national level for each of the two broad customer categories described above. The five economic regions are as follows: Pacific (British Columbia), Prairie (Alberta, Saskatchewan and Manitoba), Ontario, Québec and Atlantic (Newfoundland, New Brunswick, Prince Edward Island and Nova Scotia).

Users are cautioned that the indexes indicate only price movement variations and should not be interpreted as representative of individual utilities relative price levels.

des groupes ou strates homogènes et choisir subjectivement un contrat représentatif (dont les caractéristiques peuvent être "théoriques" de façon à garder secrets les chiffres d'un enquête) pour chaque intervalle ou strate, par ex., 5000-8000 kW, 8001-10,000 kW, 10,001-15,000 kW, 15,001-20,000 kW et plus de 20,000 kW. Ces limites et leurs contrats représentatifs sont tenus constants dans le temps pour chaque service public. Ces limites ne sont pas les mêmes pour chaque service puisque chacun regroupe des clients différents. L'indice réel pour les factures de 5000 kW et plus est une moyenne pondérée des mouvements de prix pour chaque intervalle ou strate de chaque groupe, chaque intervalle étant pondéré selon les recettes de ce service au titre des ventes de 1971. On sait pertinemment que pour les grands services, l'établissement de groupes de contrats homogènes en termes de mouvement de prix, surtout les contrats de 15,000 kW et plus, peut être impossible; par conséquent, comme solution de rechange, les services peuvent calculer un prix unitaire moyen pondéré pour chaque intervalle ou strate non homogène et appliquer cette variation de prix à un contrat représentatif théorique. De la sorte, les distorsions seront maintenues à un minimum et s'équilibreront aux niveaux de l'indice total.

3. Chaque indice est calculé selon la province, la région économique et le Canada pour chacune des deux grandes catégories de clients décrites ci-haut. Les cinq régions économiques sont: le Pacifique (Colombie-Britannique), les Prairies (Alberta, Saskatchewan et Manitoba), l'Ontario, le Québec, l'Atlantique (Terre-Neuve, Nouveau-Brunswick, Île-du-Prince-Édouard et Nouvelle-Écosse).

Les utilisateurs sont priés de noter que les indices rendent compte des variations des mouvements des prix seulement et qu'il ne faut pas les considérer comme représentatifs des niveaux relatifs des prix des divers services.

Industry price indexes

October 1978

Indices des prix de l'industrie

Octobre 1978

Discontinuation of Selected IndustrialPrice Indexes

In light of Statistics Canada expenditure reductions the following price indexes will be terminated after preparation and publication of 1978 annual indexes:

The General Wholesale Index (1935-39=100) (Table 2) including the special sub-aggregations thereof;

The Thirty Industrial Materials Index (1935-39=100) (Table 2);

The Canadian Farm Products Indexes (1971=100) (Table 4);

Index Numbers of Common and Preferred Stock Prices (1971=100) (Table 6).

Final indexes for the above-mentioned series will be published in publication 62-011 Industry Price Indexes. The discontinued series will continue to be available from CANSIM but will not appear in Industry Price Indexes after the December 1978 issue.

Users wishing assistance in their search for substitute series are invited to contact the following persons by telephone or by mail at Statistics Canada, Prices Division, No. 5 Temporary Building, 520 Preston Street, Ottawa, Ontario, K1A 0V5:

The General Wholesale Indexes -
Paul Stoochnoff (613) 995-5762

The Thirty Industrial Materials Index -
Len Cahill (613) 995-5714

The Canadian Farm Products Indexes -
Vaclav Krabicka (613) 995-5714

Index Numbers of Common and Preferred
Stock Prices -
Janet Robertson (613) 995-5714

Disparition de certains indices desprix de l'industrie

En raison des réductions des dépenses à Statistique Canada, les indices suivants paraîtront pour la dernière fois dans la publication portant sur les indices annuels de 1978:

l'indice général de gros (1935-39=100) (tableau 2) et certaines de ses composantes spéciales, à savoir,

l'indice de 30 matériaux industriels (1935-39=100) (tableau 2),

les indices des produits agricoles canadiens (1971=100) (tableau 4),

les indices des cours des actions ordinaires et privilégiées (1971=100) (tableau 6).

Les indices des séries susmentionnées seront publiés pour la dernière fois dans le numéro de décembre du bulletin 62-011, Indices des prix de l'industrie, mais on pourra encore les obtenir de CANSIM.

Les utilisateurs qui désirent de l'aide dans leur recherche de séries de remplacement sont invités à communiquer, par téléphone ou par écrit, avec Statistique Canada, Division des prix, Immeuble temporaire n° 5, rue Preston, Ottawa (Ontario) K1A 0V5.

Indice général de gros -
Paul Stoochnoff (613) 995-5762

Indice de 30 matériaux industriels -
Len Cahill (613) 995-5714

Indices des produits agricoles canadiens -
Vaclav Krabicka (613) 995-5714

Indices des cours des actions ordinaires et
privilégiées -
Janet Robertson (613) 995-5714

October 1978 Industrial Price Indexes

Due to disruption of postal service most prices used in the Industry Selling Price Indexes were collected from respondents by telephone for the month of October 1978. A high proportion of, and in many cases all, respondents were contacted in sensitive industries. Where it was not possible to contact respondents, prices for October were assumed to be unchanged from September, and changes to any of these prices subsequently reported will be incorporated later. For this reason revisions to some October Industry Selling Price Indexes may be larger than usual. Other industrial price indexes may be affected similarly.

Octobre 1978 - Indices des prix dans l'industrie

A cause de l'interruption du service postal, la plupart des prix qui servent à établir les indices des prix de vente dans l'industrie ont été recueillis par téléphone au cours du mois d'octobre. On a communiqué avec un pourcentage élevé des enquêtés, et dans bien des cas avec la totalité de ceux appartenant aux industries très sensibles aux variations. Lorsqu'il a été impossible de rejoindre les enquêtés, on a supposé que les prix étaient demeurés stables de septembre à octobre; les changements qui nous seront signalés par la suite seront pris en compte ultérieurement. Aussi certains indices des prix de vente dans l'industrie feront peut-être l'objet de révisions plus fortes que d'habitude. D'autres indices de prix pourront être touchés de la même manière.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

CANSIM[®] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data which is not included in this publication are available from CANSIM.

Table 1 (i.e., Industry Selling Price Indexes by Major Groups, Industries and Selected Commodities) includes the identification codes required to order series from CANSIM. For example, to obtain the Industry Selling Price Index: Manufacturing, the code used is D 500000.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8 or call (613) 995-7406.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombre indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

Le CANSIM[®] (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissaient pas dans cette publication sont disponibles de CANSIM.

Le Tableau 1 (Indice des prix de vente dans l'industrie par groupes, industries et par certains produits) contient les numéros d'identification qui servent à l'extraction des données de CANSIM. Par exemple, pour obtenir l'Indice de prix de vente dans l'industrie: industries manufacturières, le numéro d'identification est D 500000.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

(1) Indexes from April 1978 are subject to revision. — Les indices à compter d'avril 1978 sont sujets à révision.

(2) Gross weighted, including inter-industry shipments. For explanation see page 81. — Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 81.

(3) The available indexes for this industry are presently based on 'list' prices and may not be a reflection of actual transaction prices. Work is currently underway to replace these 'list' prices with actual transaction prices. When completed in the near future, all series for this industry will be revised starting from February 1977. Additional regional detail for commodities will become public at the same time. The major group and total manufacturing indexes will also be revised from February 1977 to reflect the changes in the industry series. To prevent misinterpretation of series as now published, index values from February 1977 forwards have been suppressed. — Les indices disponibles pour cette industrie sont présentement basés sur les prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction. On travaille présentement à remplacer ces prix de détail suggérés par des prix réels à la transaction. Bientôt, lorsque ce travail sera complété, toutes les séries pour cette industrie seront révisées à partir de février 1977. Des informations régionales sur les biens plus détaillées seront publiées en même temps. Les indices pour le groupe principal et le groupe total du secteur manufacturier seront également révisés à compter de février 1977 pour tenir compte des changements dans les séries des industries. Les indices à compter de février 1977 ont été supprimés pour éviter toute fausse interprétation des séries publiées jusqu'à maintenant.

(4) Only British Columbia prices for both rough and planed hemlock are included. — Seuls les prix de Colombie-Britannique du pruche à l'état brut et plané sont inclus.

	1978	527.7	532.2	533.1	543.7	546.3	555.1	553.6	566.7	579.4	595.8			

(1) Indexes from April 1978 are subject to revision. - Les indices à compter d'avril 1978 sont sujets à révision.

(2) Composed of Iron Products and Non-ferrous metals groups from the General Wholesale Index, covering raw and partly as well as fully and chiefly manufactured goods. - Renferme les produits du fer et les groupes de métaux non ferreux de l'indice général de gros, comprenant des matières premières et des produits partiellement ou entièrement fabriqués et les produits destinés principalement à la fabrication.

(3) The weighted average of these two series is the total General Wholesale Index. - La moyenne pondérée de ces deux séries représente tout l'indice général de gros.

(4) Excludes metals in the form of pig, ingot, scrap, cast and electrolytic. - Ne comprend pas les métaux sous forme de gueuses, lingots, ferraille, et moulages et les métaux électrolytiques.

(5) Includes rolled and formed products such as sheets, plates and pipes. - Comprend les produits laminés et façonnés comme les feuilles, les plaques et les tuyaux.

(6) Includes vegetable and animal products groups, less hay, rubber, tobacco, furs, hides and skins, leather and footwear. - Comprend les groupes de produits d'origine végétale et animale moins le foin, le caoutchouc, le tabac, les fourrures, les peaux, le cuir et les chaussures.

(7) All items except vegetable and animal products groups. - Tous les articles moins les groupes de produits d'origine végétale et animale.

TABLE 3. Purchase Price Indexes of Industrial Materials(1)
TABLEAU 3. Indices des prix d'achat des matériaux industriels(1)

1971 = 100

(1) With the revision of the Farm Input Price Index to a 1971=100 base, the source of feed prices has been changed. The Canadian Livestock Feed Board now provides the price data; to supplement this information, we now publish price indexes (1971=100) instead of average prices. — La source des prix des provendes a été changée avec l'introduction de la révision de l'indice des prix des entrées dans l'agriculture sur la base de 1971=100. Les prix proviennent maintenant de l'office canadien des provendes. Nous publions maintenant des indices de prix (1971=100) au lieu de prix moyens comme complément à cette information.

(1) Monthly prices are collected and processed three times per annum. With the release of the most current four-months indexes, indexes for the previous four-month span are revised and finalized. — Des prix mensuels sont relevés et calculés trois fois par année. Avec l'émission des indices les plus récents portant sur quatre mois, les indices pour la période de quatre mois précédents sont révisés et finalisés.

EXPLANATION OF METHODS USED AND ADDITIONAL
SOURCES FOR INDUSTRIAL PRICE INDEXES

Industry Selling Price Indexes
(1971=100)

Industry selling price indexes are published for approximately 110 industries within manufacturing. Also published are approximately 700 commodity price indexes for the products of these industries. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction data for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry selling price indexes: manufacturing 1956-1976, Catalogue 62-543 for the 1971=100 based indexes.

General Wholesale Index
(1935-1939=100)

The general wholesale index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES
SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indices des prix de vente dans l'industrie
(1971=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Près de 700 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices figure dans l'industrie: industries manufacturières, 1956-1976 n° 62-543 au catalogue pour les indices basés sur l'année repère 1971=100.

Indice général des prix de gros
(1935-1939=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène

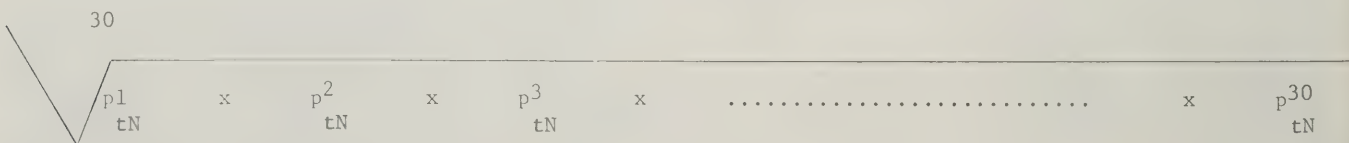

broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except insofar as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Volume 23) (Catalogue 62-501).

Thirty Industrial Materials (1935-1939=100)

The price index of 30 industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (volume 23) (n° 62-501 au catalogue).

Indice des prix de 30 matières industrielles (1935-1939=100)

L'indice des prix de 30 matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering five and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyres type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

Purchase Price Indexes of
Industrial Materials

Secondary Metals (1971=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Thermal Coal Purchase Price Index
(1971=100)

This index on a 1971=100 base is the result of a renewed demand for coal because of an anticipated shortage in energy supplies. The index for coal is a purchase price index determined by surveying electric utilities, the major users of bituminous coal. It includes purchase prices for both domestic and imported United States coal. Prices are the amount the utilities pay to suppliers, excluding federal and provincial taxes and freight rates. The weights in this index are derived from the base year purchase prices provided by the firms.

The "Thermal Coal Purchase Price Index" is calculated using the modified Laspeyres' fixed weight formula:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Where

$P_{t/o}$ is the price index (expressed as a percentage) which compares prices of the given year t with those of the base year o (1956, 1961 and 1971 respectively),

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables" (12 matières), prix des aliments (cinq matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérés comme intrants importants dans l'industrie.

Indices du prix d'achat des
matériaux industriels

Métaux secondaires (1971=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la Statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice du prix d'achat du charbon thermique
(1971=100)

Cet indice de base 1971=100 a été établi à la suite d'une nouvelle demande de charbon à cause d'une pénurie prévue en ressources énergétiques. L'indice du charbon est un indice du prix d'achat payé par les services publics d'électricité, principaux utilisateurs de charbon bitumineux. Il comprend à la fois le prix d'achat du charbon domestique et du charbon importé des États-Unis. Les prix sont ceux payés aux fournisseurs, sans les taxes fédérales et provinciales et les taux de fret. Les coefficients de pondération sont calculés à partir du prix d'achat de l'année de base fournis par les entreprises.

L'"indice du prix d'achat du charbon thermique" est établi à l'aide de l'équation modifiée de Laspeyres à pondération fixe:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Où

$P_{t/o}$ est l'indice (exprimé en pourcentage) des prix d'une année donnée t sur ceux de l'année de base o (1956, 1961 et 1971 respectivement),

Σ is the sign indicating the summation over all items contained in the index,

P_t is the price of a particular item in the given period t.

P_o is the price of a particular item in the base year o.

V_o is the fixed weight of a particular item in the base year o.

$\frac{P_t}{P_o}$ is the price ratio for a particular item(1) (expressed as a percentage) between the given period t and the base year o.

Indexes for establishment and provincial levels cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1971=100)

This index on a 1971=100 base is an up-dated version of that previously published on a 1935-1939=100 base. The weighting system is derived from the 1971 Farm Cash Receipts as collected by the Agriculture Division of Statistics Canada. The receipts measure the value of farm production less inter-farm payments and income-in-kind. Prices are obtained from terminal markets.

The Canadian Wheat Board announced final payments for the crop year 1976-77 on January 5, 1978 and the index includes them. The estimates for the total payments for 1977-78 are the initial payments plus a half of the 1976-77 crop year payments.

The indexes for 1978-79 are based on initial payments only.

Σ est le symbole qui indique la somme de tous les articles de l'indice,

P_t est le prix d'un article particulier pendant la période donnée t,

P_o est le prix d'un article particulier pendant l'année de base o,

V_o est le coefficient de pondération fixe d'un article particulier pendant l'année de base o,

$\frac{P_t}{P_o}$ est le rapport (exprimé en pourcentage) du prix d'un article particulier(1) entre la période donnée t et l'année de base o.

Les indices aux niveaux de l'établissement et de la province ne peuvent être publiés puisque la confidentialité des données doit être assurée en vertu de la Loi sur la statistique.

Indice des prix des produits agricoles canadiens (1971=100)

Cet indice, qui se fonde sur l'année de base (1971=100) constitue une mise à jour de l'indice antérieur établi sur la base 1935-1939=100. Le système de pondération est tiré des recettes monétaires agricoles de 1971 qui ont été recueillies par la Division de l'agriculture de Statistique Canada. Ces recettes indiquent la valeur de la production agricole moins les paiements entre agriculteurs et les revenus en nature. Les prix proviennent des marchés terminaux.

La Commission canadienne du blé a annoncé les paiements finals de l'année de récolte 1976-77 le 5 janvier 1978 et l'indice en tient compte. Les estimés des paiements totaux pour 1977-78 couvrent les paiements initiaux et la moitié des paiements de l'année de récolte 1976-77.

Les indices pour 1978-79 sont basés sur le premier paiement seulement.

Security Price Indexes (1971=100)

Revised security price indexes on the base 1971=100 were presented for the first time in the May 1975 issue of Catalogue 62-002. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily

Indices des cours des valeurs mobilières (1971=100)

Les indices révisés des cours des valeurs mobilières sur la base 1971=100 ont été présentés pour la première fois dans le n° 62-002 au catalogue, mai 1975. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1^{er} janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de

closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-74.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

For the list of stocks currently included in the indexes, see the special supplement in the May 1975 issue of Prices and Price Indexes (Catalogue 62-002).

Price Indexes of Machinery and Equipment (1968=100)

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-74.

Les actions faisant partie des indices sont classés selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Pour la liste les actions habituellement comprises dans les indices, consulter le supplément spécial dans l'édition de mai 1975 de la publication Prix et indices des prix (no 62-002 au catalogue).

Indices des prix des machines et du matériel (1968=100)

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminée pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Electric Power Selling Price Indexes (Non-Residential)

1. Brief Description

The Electric Power Selling Price Indexes are designed to measure "pure" price change at the producers' level, i.e., at the "factory gate". Since the industry's transmission lines are considered as part of the producer's operation, the "factory gate" in this index is at the user's end. These indexes are part of a larger system of indexes known as the Industry Selling Price Indexes and conform to the underlying concepts as described in reference document, Catalogue 62-543.

Industry Selling Price Indexes are a measure of pure price change of specified commodities having a fixed time and weight base of 1971=100. Prices are f.o.b. factory gate less discounts and before taxes. The 1971 Gross Shipment Values are gathered by the Census of Manufacturers. In the case of Electric Power Selling Price Indexes, weights are based on the 1971 revenue from electricity sales gathered by Prices Division.

The Electric Power Selling Price Index series is published in two broad customer categories of sales, (1) an index for bills less than 5000 kw. and (2) an index for large industrial sales, bills or contracts 5000 kw. and over. Data are presented from 1971 onward, on a monthly basis. Only firm (non-interruptible) power is being surveyed. Interruptible and off-peak power price movement is not included in this index. The survey methodology is described under each of the two broad customer categories.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de vente de l'énergie électrique (non résidentielle)

1. Brève description

Les indices des prix de vente de l'énergie électrique visent à mesurer la variation de prix "pure" au niveau de la production, c'est-à-dire, au "départ de l'usine". Étant donné que les lignes de transport de l'entreprise font ici partie de l'exploitation du producteur, le présent indice prend comme point de "départ de l'usine" l'entrée chez l'utilisateur. Ces indices appartiennent à un plus grand système d'indices appelé Indices de prix de vente dans l'industrie et s'appuient sur les concepts décrits dans le document de référence qui doit paraître bientôt (n° 62-543 au catalogue).

Les indices de prix de vente dans l'industrie mesurent la variation de prix pure de certains produits ayant une base fixe de période et de pondération (1971=100). Il s'agit des prix f.o.b. départ usine moins les remises et avant impôt. Les valeurs des livraisons brutes sont recueillies par le recensement des manufactures. Dans le cas de l'indice des prix de vente de l'énergie électrique, les pondérations sont basées sur les recettes au titre des ventes de 1971, dont les données ont été recueillies par la Division des prix.

L'indice des prix de vente de l'énergie électrique paraît pour deux grandes catégories de ventes selon le client, à savoir: (1) un indice pour les factures de moins de 5000 kW et (2) un indice pour les ventes, factures ou contrats industriels de 5000 kW et plus. Nous publions ces données chaque mois depuis 1971. Seule l'énergie garantie, non susceptible d'être interrompue fait l'objet du relevé, les mouvements de prix de l'énergie susceptible d'être interrompue et de l'énergie des heures creuses n'étant pas compris dans l'indice. Les méthodes d'enquête figurent sous chacune des deux grandes catégories.

Whenever specification changes occur thereby altering the quality of the item being priced, quality change evaluations are made to ascertain only pure price change since the commodity characteristics must remain constant in order to measure pure price change over a given period of time, using Laspeyres formula as follows:

$$Pt/o = \frac{\sum \frac{Pt \times Vo}{Po}}{\sum Vo} \times 100$$

Pt/o = index for year t

Pt = price of an item in the given period

Po = price of an item in year o, the base year

Vo = weight of an item in the base period

Pt/Po = is the price ratio for a particular item.

2. Methodology

(a) Bills Less Than 5000 kw.

In this category a "representative bill" was selected subjectively through examination of the bills in each of the municipalities drawn in our provincial samples. Some 120 municipalities were surveyed in the sample and the municipalities selected represent a good coverage of each province in terms of sales. The representative bill was established and its kw. demand and kwh. consumption specifications will be held constant until it is found, on periodic review, that the bill is no longer representative of the monthly bills in that municipality. When this occurs a new representative bill will be selected and its price "spliced in" to the original bill to maintain the continuity of the index. Larger municipalities may have more than one representative bill where several significant groupings of bills have been identified. All provinces are included in the survey.

(b) Bills 5000 kw. and Over

This customer category presented problems in sampling. The category is composed of customers whose contract prices do not necessarily move as a family of curves. In many cases larger contracts are given a different price adjustment by utilities, than the lesser ones. In order to eliminate this sampling problem, a stratified sampling technique was used whereby homogeneous

Toutes les fois qu'il se produit une variation de la qualité du produit relevé, on procède à une évaluation de la variation de la qualité afin de s'assurer que seule la variation de prix pure est prise en compte, puisque les caractéristiques du produit doivent demeurer constantes si l'on veut mesurer une variation de prix pure sur une période donnée. On se sert de Laspeyres de la façon suivante:

$$Pt/o = \frac{\sum \frac{Pt \times Vo}{Po}}{\sum Vo} \times 100$$

Pt/o = indice pour l'année "t"

Pt = prix d'un article particulier pendant une période donnée

Po = prix d'un article particulier pendant l'année "o", année de base

Vo = coefficient de pondération d'un article pendant la période de base

Pt/Po = ratio des prix pour un article particulier.

2. Méthodologie

a) Factures de moins de 5000 kW

Dans cette catégorie une "facture représentative" a été choisie subjectivement parmi les factures de chacune des municipalités tirées de nos échantillons provinciaux. Les quelque 120 municipalités de l'échantillon sont représentatives des ventes effectuées dans chaque province. À la facture choisie sont attribuées des caractéristiques, c'est-à-dire la demande en kW et la consommation en KWh, que l'on conserve jusqu'à ce que, après un examen périodique, on estime que la facture ne représente plus le prix mensuel des factures de cette municipalité. Dans ce cas, une nouvelle facture représentative est choisie et son prix est "ajusté" d'après la facture originale pour ne pas créer une discontinuité dans la série. Les grandes municipalités peuvent avoir plus d'une facture représentative lorsque plusieurs groupements de factures ont été établis. Toutes les provinces sont visées par l'enquête.

b) Factures de 5000 kW et plus

Cette catégorie de clients présente certains problèmes d'échantillonnage; elle se compose dans son ensemble de clients pour lesquels les mouvements des prix des contrats ne vont pas nécessairement dans le même sens. Dans de nombreux cas, les gros contrats font l'objet d'un rajustement de prix par service, différent de celui des petits contrats. Afin d'éliminer ce problème, on a utilisé une technique d'échantillonnage stratifié pour établir

groups or strata were established and a representative contract was selected subjectively for each interval or stratum, e.g., 5000-8000 kw., 8001-10,000 kw., 10,001-15,000 kw., 15,001-20,000 kw., and over 20,000 kw. (the specifications used may be theoretical in order to respect the confidentiality of a respondent). Interval boundaries and their representative contracts are held constant through time for each utility. These interval boundaries differ between utilities since each one has a different customer category make-up. The actual index of the "5000 kw. and over" category is a weighted average of the price movements for each interval or stratum within that group. Each interval is weighted according to the utility's revenue from sales for 1971. It is recognized that in the larger utilities the establishment of homogeneous groups of contracts in terms of price movement, especially in the contracts 15,000 kw. and over, may not be possible. Consequently, as an alternative, utilities may calculate a weighted average unit price in each of the intervals of strata that are not homogeneous and apply this price movement to a theoretical representative contract. In this way distortions will be minimized and at the total index levels will be averaged out.

3. Individual indexes are calculated for the province, economic region and at the national level for each of the two broad customer categories described above. The five economic regions are as follows: Pacific (British Columbia), Prairie (Alberta, Saskatchewan and Manitoba), Ontario, Québec and Atlantic (Newfoundland, New Brunswick, Prince Edward Island and Nova Scotia).

Users are cautioned that the indexes indicate only price movement variations and should not be interpreted as representative of individual utilities relative price levels.

des groupes ou strates homogènes et choisir subjectivement un contrat représentatif (dont les caractéristiques peuvent être "théoriques" de façon à garder secrets les chiffres d'un enquête) pour chaque intervalle ou strate, par ex., 5000-8000 kW, 8001-10,000 kW, 10,001-15,000 kW, 15,001-20,000 kW et plus de 20,000 kW. Ces limites et leurs contrats représentatifs sont tenus constants dans le temps pour chaque service public. Ces limites ne sont pas les mêmes pour chaque service puisque chacun regroupe des clients différents. L'indice réel pour les factures de 5000 kW et plus est une moyenne pondérée des mouvements de prix pour chaque intervalle ou strate de chaque groupe, chaque intervalle étant pondéré selon les recettes de ce service au titre des ventes de 1971. On sait pertinemment que pour les grands services, l'établissement de groupes de contrats homogènes en termes de mouvement de prix, surtout les contrats de 15,000 kW et plus, peut être impossible; par conséquent, comme solution de rechange, les services peuvent calculer un prix unitaire moyen pondéré pour chaque intervalle ou strate non homogène et appliquer cette variation de prix à un contrat représentatif théorique. De la sorte, les distorsions seront maintenues à un minimum et s'équilibreront aux niveaux de l'indice total.

3. Chaque indice est calculé selon la province, la région économique et le Canada pour chacune des deux grandes catégories de clients décrites ci-haut. Les cinq régions économiques sont: le Pacifique (Colombie-Britannique), les Prairies (Alberta, Saskatchewan et Manitoba), l'Ontario, le Québec, l'Atlantique (Terre-Neuve, Nouveau-Brunswick, Île-du-Prince-Édouard et Nouvelle-Écosse).

Les utilisateurs sont priés de noter que les indices rendent compte des variations des mouvements des prix seulement et qu'il ne faut pas les considérer comme représentatifs des niveaux relatifs des prix des divers services.

Other Major Groups(2)	15.6	161.3	160.5	148.5	0.5	8.6	11.8	14.6

* These indexes are preliminary.

(1) Group weights are based on 1971 value of shipments (Census of Manufactures, 1971)

(2) Included are the following major groups: 7. Clothing Industries, 15. Transportation Equipment Industries, 20. Miscellaneous Manufacturing Industries.

Petroleum Refineries (SIC 3651) — The available indexes for this industry are presently based on "list" prices and may not be a reflection of actual transaction prices. Work is currently underway to replace these "list" prices with actual transaction prices. When completed in the near future, all series for this industry will be revised starting from February 1977. Additional regional detail for commodities will become public at the same time. The major group and total manufacturing indexes will also be revised from February 1977 to reflect the changes in the industry series. To prevent misinterpretation of series as now published, index values from February 1977 forward have been suppressed.

Industry Selling Price Index: Manufacturing (1971=100), August 1978 — Advance Information

The Industry Selling Price Index for manufacturing rose 0.6% to 189.2 in August from its revised July level of 188.1. The index was 7.7% higher than in August 1977 when it stood at 175.6. The major groups having the most effect on the total index in August were primary metal industries, wood industries, food and beverage industries, and paper and allied industries.

The primary metal industries index rose by 1.7%, due largely to price increases of 4.1% in smelting and refining.

An increase of 2.7% in the wood industries index was mainly attributable to a rise of 3.9% for sawmills and planing mills.

In the food and beverage industries group, which registered an over-all increase of 0.3%, there were increases of 1.3% for slaughtering and meat processors, 4.9% for cane and beet sugar processors, 1.8% for poultry processors and 0.9% for fruit and vegetable canners and preservers. The miscellaneous food processors index decreased by 1.0%, the fish products industry index by 1.1%, and the feed industry index by 0.6%.

The paper and allied industries index showed an increase of 0.7% primarily on account of a 0.8% rise for pulp and paper mills.

For further information, order the August issue of *Industry Price Indexes* (62-011, 55¢/\$5.50), or contact the Information Unit, Industrial Prices (613-995-5761), Prices Division, Statistics Canada, Ottawa K1A 0V5.

Electric Power Statistics, July 1978 — Advance Information

In July net generation increased to 24.0 TW.h from 23.8 TW.h in July 1977. Hydro generation rose 5.2% while thermal production decreased 9.2%.

For further information, order the July issue of *Electric Power Statistics* (57-001, 30¢/\$3), or contact David Madsen (613-992-4021), Manufacturing and Primary Industries Division, Statistics Canada, Ottawa K1A 0T6.

General Wholesale Price Index (1935-39=100), August 1978 — Advance Information

The General Wholesale Index rose 1.1% to 610.1 in August from its revised July level of 603.3. The index was 8.1% higher than in August 1977 when it stood at 564.4. The major groups having the most effect on the total index in August were wood products, non-ferrous metals including gold, animal products and vegetable products.

The wood products index rose 2.0%, due in part to price increases of 4.6% for fir and 1.2% for newsprint and wrapping paper.

The index for non-ferrous metals including gold advanced 2.7%, largely reflecting increases of 8.5% for silver, 2.7% for copper and 15.8% for gold.

In the animal products group, which registered a 1.1% increase, fresh meats rose by 4.2%, leather by 3.5% and livestock by 0.5%.

An increase of 0.8% in the vegetable products group index was attributable mainly to price increases of 8.8% for sugar and its products, 1.7% for grains and 1.9% for tea, coffee and cocoa; potatoes showed a decrease of 13.8%.

For further information, order the August issue of *Industry Price Indexes* (62-011, 55¢/\$5.50), or contact the Industrial Prices Information Unit (613-995-5761), Prices Division, Statistics Canada, Ottawa K1A 0V5.

Campus Book Stores, 1977-78 — Advance Information

Total net retail sales of the 212 campus book stores during the 1977-78 year increased 13.1% over the previous year to \$92.7 million. Textbooks accounted for 62.6% of total sales, trade books for 12.6% and stationery, supplies and miscellaneous items 24.8%. Employment of 1,434 personnel during the last week of November 1977 was 4.4% higher than a year earlier and payroll expanded 10.3% to \$12.9 million.

For further information, order *Campus Book Stores, 1977-78* (63-219, 70¢), or contact the Retail Trade Section (613-996-9304 or telex 053-3585), Merchandising and Services Division, Statistics Canada, Ottawa K1A 0V4.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

CANSIM[®] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data which is not included in this publication are available from CANSIM.

Table 1 (i.e., Industry Selling Price Indexes by Major Groups, Industries and Selected Commodities) includes the identification codes required to order series from CANSIM. For example, to obtain the Industry Selling Price Index: Manufacturing, the code used is D 500000.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8 or call (613) 995-7406.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombre indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

Le CANSIM[®] (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissaient pas dans cette publication sont disponibles de CANSIM.

Le Tableau 1 (Indice des prix de vente dans l'industrie par groupes, industries et par certains produits) contient les numéros d'identification qui servent à l'extraction des données de CANSIM. Par exemple, pour obtenir l'Indice de prix de vente dans l'industrie: industries manufacturières, le numéro d'identification est D 500000.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

(1) Indexes from May 1978 are subject to revision. — Les indices à compter de mai 1978 sont sujets à révision.

(2) Gross weighted, including inter-industry shipments. For explanation see page 81. — Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 81.

(3) The available indexes for this industry are presently based on 'list' prices and may not be a reflection of actual transaction prices. Work is currently underway to replace these 'list' prices with actual transaction prices. When completed in the near future, all series for this industry will be revised starting from February 1977. Additional regional detail for commodities will become public at the same time. The major group and total manufacturing indexes will also be revised from February 1977 to reflect the changes in the industry series. To prevent misinterpretation of series as now published, index values from February 1977 forwards have been suppressed. — Les indices disponibles pour cette industrie sont présentement basés sur les prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction. On travaille présentement à remplacer ces prix de détail suggérés par des prix réels à la transaction. Bientôt, lorsque ce travail sera complété, toutes les séries pour cette industrie seront révisées à partir de février 1977. Des informations régionales sur les biens plus détaillés seront publiées en même temps. Les indices pour le groupe principal et le groupe total du secteur manufacturier seront également révisés à compter de février 1977 pour tenir compte des changements dans les séries des industries. Les indices à compter de février 1977 ont été supprimés pour éviter toute fausse interprétation des séries publiées jusqu'à maintenant.

(4) Only British Columbia prices for both rough and planed hemlock are included. — Seuls les prix de Colombie-Britannique du pruche à l'état brut et plané sont inclus.

D 601017														

(1) Indexes from May 1978 are subject to revision. - Les indices à compter de mai 1978 sont sujets à révision.

(2) Composed of Iron Products and Non-ferrous metals groups from the General Wholesale Index, covering raw and partly as well as fully and chiefly manufactured goods. - Renferme les produits du fer et les groupes de métaux non ferreux de l'indice général de gros, comprenant des matières premières et des produits partiellement ou entièrement fabriqués et les produits destinés principalement à la fabrication.

(3) The weighted average of these two series is the total General Wholesale Index. - La moyenne pondérée de ces deux séries représente tout l'indice général de gros.

(4) Excludes metals in the form of pig, ingot, scrap, cast and electrolytic. - Ne comprend pas les métaux sous forme de gueuses, lingots, ferraille, et moulages et les métaux électrolytiques.

(5) Includes rolled and formed products such as sheets, plates and pipes. - Comprend les produits laminés et façonnés comme les feuilles, les plaques et les tuyaux.

(6) Includes vegetable and animal products groups, less hay, rubber, tobacco, furs, hides and skins, leather and footwear. - Comprend les groupes de produits d'origine végétale et animale moins le foin, le caoutchouc, le tabac, les fourrures, les peaux, le cuir et les chaussures.

(7) All items except vegetable and animal products groups. - Tous les articles moins les groupes de produits d'origine végétale et animale.

(1) With the revision of the Farm Input Price Index to a 1971=100 base, the source of feed prices has been changed. The Canadian Livestock Feed Board now provides the price data; to supplement this information, we now publish price indexes (1971=100) instead of average prices. — La source des prix des provendes a été changée avec l'introduction de la révision de l'indice des prix des entrées dans l'agriculture sur la base de 1971=100. Les prix proviennent maintenant de l'office canadien des provendes. Nous publions maintenant des indices de prix (1971=100) au lieu de prix moyens comme complément à cette information.

(1) Monthly prices are collected and processed three times per annum. With the release of the most current four-months indexes, indexes for the previous four-month span are revised and finalized. — Des prix mensuels sont relevés et calculés trois fois par année. Avec l'émission des indices les plus récents portant sur quatre mois, les indices pour la période de quatre mois précédents sont révisés et finalisés.

EXPLANATION OF METHODS USED AND ADDITIONAL
SOURCES FOR INDUSTRIAL PRICE INDEXES

Industry Selling Price Indexes
(1971=100)

Industry selling price indexes are published for approximately 110 industries within manufacturing. Also published are approximately 700 commodity price indexes for the products of these industries. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction data for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry selling price indexes: manufacturing 1956-1976, Catalogue 62-543 for the 1971=100 based indexes.

General Wholesale Index
(1935-1939=100)

The general wholesale index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES
SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indices des prix de vente dans l'industrie
(1971=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Près de 700 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices figure dans l'industrie: industries manufacturières, 1956-1976 n° 62-543 au catalogue pour les indices basés sur l'année repère 1971=100.

Indice général des prix de gros
(1935-1939=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène

broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except insofar as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Volume 23) (Catalogue 62-501).

Thirty Industrial Materials (1935-1939=100)

The price index of 30 industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{p_1 \times p_2 \times p_3 \times \dots \times p_{30}}$$

$\frac{p_1}{tN} \quad \times \quad \frac{p_2}{tN} \quad \times \quad \frac{p_3}{tN} \quad \times \quad \dots \quad \times \quad \frac{p_{30}}{tN}$

de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (volume 23) (n° 62-501 au catalogue).

Indice des prix de 30 matières industrielles (1935-1939=100)

L'indice des prix de 30 matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering five and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Lasperyes type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

Purchase Price Indexes of Industrial Materials

Secondary Metals (1971=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Thermal Coal Purchase Price Index (1971=100)

This index on a 1971=100 base is the result of a renewed demand for coal because of an anticipated shortage in energy supplies. The index for coal is a purchase price index determined by surveying electric utilities, the major users of bituminous coal. It includes purchase prices for both domestic and imported United States coal. Prices are the amount the utilities pay to suppliers, excluding federal and provincial taxes and freight rates. The weights in this index are derived from the base year purchase prices provided by the firms.

The "Thermal Coal Purchase Price Index" is calculated using the modified Lasperyes' fixed weight formula:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Where

$P_{t/o}$ is the price index (expressed as a percentage) which compares prices of the given year t with those of the base year o (1956, 1961 and 1971 respectively),

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables" (12 matières), prix des aliments (cinq matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérés comme intrants importants dans l'industrie.

Indices du prix d'achat des matériaux industriels

Métaux secondaires (1971=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la Statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice du prix d'achat du charbon thermique (1971=100)

Cet indice de base 1971=100 a été établi à la suite d'une nouvelle demande de charbon à cause d'une pénurie prévue en ressources énergétiques. L'indice du charbon est un indice du prix d'achat payé par les services publics d'électricité, principaux utilisateurs de charbon bitumineux. Il comprend à la fois le prix d'achat du charbon domestique et du charbon importé des États-Unis. Les prix sont ceux payés aux fournisseurs, sans les taxes fédérales et provinciales et les taux de fret. Les coefficients de pondération sont calculés à partir du prix d'achat de l'année de base fournis par les entreprises.

L'indice du prix d'achat du charbon thermique est établi à l'aide de l'équation modifiée de Lasperyes à pondération fixe:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Où

$P_{t/o}$ est l'indice (exprimé en pourcentage) des prix d'une année donnée t sur ceux de l'année de base o (1956, 1961 et 1971 respectivement),

Σ is the sign indicating the summation over all items contained in the index,

P_t is the price of a particular item in the given period t.

P_o is the price of a particular item in the base year o.

V_o is the fixed weight of a particular item in the base year o.

$\frac{P_t}{P_o}$ is the price ratio for a particular item(1) (expressed as a percentage) between the given period t and the base year o.

Indexes for establishment and provincial levels cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1971=100)

This index on a 1971=100 base is an up-dated version of that previously published on a 1935-1939=100 base. The weighting system is derived from the 1971 Farm Cash Receipts as collected by the Agriculture Division of Statistics Canada. The receipts measure the value of farm production less inter-farm payments and income-in-kind. Prices are obtained from terminal markets.

The Canadian Wheat Board announced final payments for the crop year 1976-77 on January 5, 1978 and the index includes them. The estimates for the total payments for 1977-78 are the initial payments plus a half of the 1976-77 crop year payments.

The indexes for 1978-79 are based on initial payments only.

Σ est le symbole qui indique la somme de tous les articles de l'indice,

P_t est le prix d'un article particulier pendant la période donnée t,

P_o est le prix d'un article particulier pendant l'année de base o,

V_o est le coefficient de pondération fixe d'un article particulier pendant l'année de base 0,

$\frac{P_t}{P_o}$ est le rapport (exprimé en pourcentage) du prix d'un article particulier(1) entre la période donnée t et l'année de base o.

Les indices aux niveaux de l'établissement et de la province ne peuvent être publiés puisque la confidentialité des données doit être assurée en vertu de la Loi sur la statistique.

Indice des prix des produits agricoles canadiens (1971=100)

Cet indice, qui se fonde sur l'année de base (1971=100) constitue une mise à jour de l'indice antérieur établi sur la base 1935-1939=100. Le système de pondération est tiré des recettes monétaires agricoles de 1971 qui ont été recueillies par la Division de l'agriculture de Statistique Canada. Ces recettes indiquent la valeur de la production agricole moins les paiements entre agriculteurs et les revenus en nature. Les prix proviennent des marchés terminaux.

La Commission canadienne du blé a annoncé les paiements finals de l'année de récolte 1976-77 le 5 janvier 1978 et l'indice en tient compte. Les estimés des paiements totaux pour 1977-78 couvrent les paiements initiaux et la moitié des paiements de l'année de récolte 1976-77.

Les indices pour 1978-79 sont basés sur le premier paiement seulement.

Security Price Indexes (1971=100)

Revised security price indexes on the base 1971=100 were presented for the first time in the May 1975 issue of Catalogue 62-002. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily

Indices des cours des valeurs mobilières (1971=100)

Les indices révisés des cours des valeurs mobilières sur la base 1971=100 ont été présentés pour la première fois dans le n° 62-002 au catalogue, mai 1975. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1^{er} janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de

closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-74.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

For the list of stocks currently included in the indexes, see the special supplement in the May 1975 issue of Prices and Price Indexes (Catalogue 62-002).

Price Indexes of Machinery and Equipment (1968=100)

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-74.

Les actions faisant partie des indices sont classés selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Pour la liste les actions habituellement comprises dans les indices, consulter le supplément spécial dans l'édition de mai 1975 de la publication Prix et indices des prix (n° 62-002 au catalogue).

Indices des prix des machines et du matériel (1968=100)

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminée pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Electric Power Selling Price Indexes (Non-Residential)

1. Brief Description

The Electric Power Selling Price Indexes are designed to measure "pure" price change at the producers' level, i.e., at the "factory gate". Since the industry's transmission lines are considered as part of the producer's operation, the "factory gate" in this index is at the user's end. These indexes are part of a larger system of indexes known as the Industry Selling Price Indexes and conform to the underlying concepts as described in reference document, Catalogue 62-543.

Industry Selling Price Indexes are a measure of pure price change of specified commodities having a fixed time and weight base of 1971=100. Prices are f.o.b. factory gate less discounts and before taxes. The 1971 Gross Shipment Values are gathered by the Census of Manufacturers. In the case of Electric Power Selling Price Indexes, weights are based on the 1971 revenue from electricity sales gathered by Prices Division.

The Electric Power Selling Price Index series is published in two broad customer categories of sales, (1) an index for bills less than 5000 kw. and (2) an index for large industrial sales, bills or contracts 5000 kw. and over. Data are presented from 1971 onward, on a monthly basis. Only firm (non-interruptible) power is being surveyed. Interruptible and off-peak power price movement is not included in this index. The survey methodology is described under each of the two broad customer categories.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de vente de l'énergie électrique (non résidentielle)

1. Brève description

Les indices des prix de vente de l'énergie électrique visent à mesurer la variation de prix "pure" au niveau de la production, c'est-à-dire, au "départ de l'usine". Étant donné que les lignes de transport de l'entreprise font ici partie de l'exploitation du producteur, le présent indice prend comme point de "départ de l'usine" l'entrée chez l'utilisateur. Ces indices appartiennent à un plus grand système d'indices appelé Indices de prix de vente dans l'industrie et s'appuient sur les concepts décrits dans le document de référence qui doit paraître bientôt (n° 62-543 au catalogue).

Les indices de prix de vente dans l'industrie mesurent la variation de prix pure de certains produits ayant une base fixe de période et de pondération (1971=100). Il s'agit des prix f.o.b. départ usine moins les remises et avant impôt. Les valeurs des livraisons brutes sont recueillies par le recensement des manufactures. Dans le cas de l'indice des prix de vente de l'énergie électrique, les pondérations sont basées sur les recettes au titre des ventes de 1971, dont les données ont été recueillies par la Division des prix.

L'indice des prix de vente de l'énergie électrique paraît pour deux grandes catégories de ventes selon le client, à savoir: (1) un indice pour les factures de moins de 5000 kW et (2) un indice pour les ventes, factures ou contrats industriels de 5000 kW et plus. Nous publions ces données chaque mois depuis 1971. Seule l'énergie garantie, non susceptible d'être interrompue fait l'objet du relevé, les mouvements de prix de l'énergie susceptible d'être interrompue et de l'énergie des heures creuses n'étant pas compris dans l'indice. Les méthodes d'enquête figurent sous chacune des deux grandes catégories.

Whenever specification changes occur thereby altering the quality of the item being priced, quality change evaluations are made to ascertain only pure price change since the commodity characteristics must remain constant in order to measure pure price change over a given period of time, using Laspeyres formula as follows:

$$Pt/o = \frac{\sum \frac{Pt \times Vo}{Po}}{\sum Vo} \times 100$$

Pt/o = index for year t

Pt = price of an item in the given period

Po = price of an item in year o, the base year

Vo = weight of an item in the base period

Pt/Po = is the price ratio for a particular item.

Toutes les fois qu'il se produit une variation de la qualité du produit relevé, on procède à une évaluation de la variation de la qualité afin de s'assurer que seule la variation de prix pure est prise en compte, puisque les caractéristiques du produit doivent demeurer constantes si l'on veut mesurer une variation de prix pure sur une période donnée. On se sert de Laspeyres de la façon suivante:

$$Pt/o = \frac{\sum \frac{Pt \times Vo}{Po}}{\sum Vo} \times 100$$

Pt/o = indice pour l'année "t"

Pt = prix d'un article particulier pendant une période donnée

Po = prix d'un article particulier pendant l'année "o", année de base

Vo = coefficient de pondération d'un article pendant la période de base

Pt/Po = ratio des prix pour un article particulier.

2. Methodology

(a) Bills Less Than 5000 kw.

In this category a "representative bill" was selected subjectively through examination of the bills in each of the municipalities drawn in our provincial samples. Some 120 municipalities were surveyed in the sample and the municipalities selected represent a good coverage of each province in terms of sales. The representative bill was established and its kw. demand and kwh. consumption specifications will be held constant until it is found, on periodic review, that the bill is no longer representative of the monthly bills in that municipality. When this occurs a new representative bill will be selected and its price "spliced in" to the original bill to maintain the continuity of the index. Larger municipalities may have more than one representative bill where several significant groupings of bills have been identified. All provinces are included in the survey.

(b) Bills 5000 kw. and Over

This customer category presented problems in sampling. The category is composed of customers whose contract prices do not necessarily move as a family of curves. In many cases larger contracts are given a different price adjustment by utilities, than the lesser ones. In order to eliminate this sampling problem, a stratified sampling technique was used whereby homogeneous

2. Méthodologie

a) Factures de moins de 5000 kW

Dans cette catégorie une "facture représentative" a été choisie subjectivement parmi les factures de chacune des municipalités tirées de nos échantillons provinciaux. Les quelque 120 municipalités de l'échantillon sont représentatives des ventes effectuées dans chaque province. À la facture choisie sont attribuées des caractéristiques, c'est-à-dire la demande en kW et la consommation en KWh, que l'on conserve jusqu'à ce que, après un examen périodique, on estime que la facture ne représente plus le prix mensuel des factures de cette municipalité. Dans ce cas, une nouvelle facture représentative est choisie et son prix est "ajusté" d'après la facture originale pour ne pas créer une discontinuité dans la série. Les grandes municipalités peuvent avoir plus d'une facture représentative lorsque plusieurs groupements de factures ont été établis. Toutes les provinces sont visées par l'enquête.

b) Factures de 5000 kW et plus

Cette catégorie de clients présente certains problèmes d'échantillonnage; elle se compose dans son ensemble de clients pour lesquels les mouvements des prix des contrats ne vont pas nécessairement dans le même sens. Dans de nombreux cas, les gros contrats font l'objet d'un rajustement de prix par service, différent de celui des petits contrats. Afin d'éliminer ce problème, on a utilisé une technique d'échantillonnage stratifié pour établir

groups or strata were established and a representative contract was selected subjectively for each interval or stratum, e.g., 5000-8000 kw., 8001-10,000 kw., 10,001-15,000 kw., 15,001-20,000 kw., and over 20,000 kw. (the specifications used may be theoretical in order to respect the confidentiality of a respondent). Interval boundaries and their representative contracts are held constant through time for each utility. These interval boundaries differ between utilities since each one has a different customer category make-up. The actual index of the "5000 kw. and over" category is a weighted average of the price movements for each interval or stratum within that group. Each interval is weighted according to the utility's revenue from sales for 1971. It is recognized that in the larger utilities the establishment of homogeneous groups of contracts in terms of price movement, especially in the contracts 15,000 kw. and over, may not be possible. Consequently, as an alternative, utilities may calculate a weighted average unit price in each of the intervals of strata that are not homogeneous and apply this price movement to a theoretical representative contract. In this way distortions will be minimized and at the total index levels will be averaged out.

3. Individual indexes are calculated for the province, economic region and at the national level for each of the two broad customer categories described above. The five economic regions are as follows: Pacific (British Columbia), Prairie (Alberta, Saskatchewan and Manitoba), Ontario, Québec and Atlantic (Newfoundland, New Brunswick, Prince Edward Island and Nova Scotia).

Users are cautioned that the indexes indicate only price movement variations and should not be interpreted as representative of individual utilities relative price levels.

des groupes ou strates homogènes et choisir subjectivement un contrat représentatif (dont les caractéristiques peuvent être "théoriques" de façon à garder secrets les chiffres d'un enquête) pour chaque intervalle ou strate, par ex., 5000-8000 kW, 8001-10,000 kW, 10,001-15,000 kW, 15,001-20,000 kW et plus de 20,000 kW. Ces limites et leurs contrats représentatifs sont tenus constants dans le temps pour chaque service public. Ces limites ne sont pas les mêmes pour chaque service puisque chacun regroupe des clients différents. L'indice réel pour les factures de 5000 kW et plus est une moyenne pondérée des mouvements de prix pour chaque intervalle ou strate de chaque groupe, chaque intervalle étant pondéré selon les recettes de ce service au titre des ventes de 1971. On sait pertinemment que pour les grands services, l'établissement de groupes de contrats homogènes en termes de mouvement de prix, surtout les contrats de 15,000 kW et plus, peut être impossible; par conséquent, comme solution de rechange, les services peuvent calculer un prix unitaire moyen pondéré pour chaque intervalle ou strate non homogène et appliquer cette variation de prix à un contrat représentatif théorique. De la sorte, les distorsions seront maintenues à un minimum et s'équilibreront aux niveaux de l'indice total.

3. Chaque indice est calculé selon la province, la région économique et le Canada pour chacune des deux grandes catégories de clients décrites ci-haut. Les cinq régions économiques sont: le Pacifique (Colombie-Britannique), les Prairies (Alberta, Saskatchewan et Manitoba), l'Ontario, le Québec, l'Atlantique (Terre-Neuve, Nouveau-Brunswick, Île-du-Prince-Édouard et Nouvelle-Écosse).

Les utilisateurs sont priés de noter que les indices rendent compte des variations des mouvements des prix seulement et qu'il ne faut pas les considérer comme représentatifs des niveaux relatifs des prix des divers services.

General Wholesale Price Index (1935-39=100), September 1978 — Advance Information

The General Wholesale Index rose 1.2% to 618.2 in September from its revised August level of 611.0. The index was 9.4% higher than in September 1977 when it stood at 565.0. The major groups having the most effect on the total index in September were vegetable products, animal products and wood products.

There was a rise of 1.8% in the vegetable products index, attributable in part to price increases of 8.1% for sugar and its products, 1.7% for grains and 2.9% for tea, coffee and cocoa. The index for potatoes decreased by 12.0%.

The animal products index was up 1.8%, largely reflecting increases of 2.5% for livestock, 2.9% for fresh meats, 2.3% for cured meats, 3.7% for leather and 1% for fish.

The index for wood products rose 1.1% mainly on account of increases of 1.3% for newsprint and wrapping paper, 1.6% for cedar, 2.1% for woodpulp and 0.8% for fir.

For further information, order the September issue of *Industry Price Indexes* (62-011, 55¢/\$5.50), or contact the Information Unit, Industrial Prices (613-995-5761), Prices Division, Statistics Canada, Ottawa K1A 0V5.

Industrial Chemicals, September 1978 — Advance Information

Canadian manufacturers shipped 129,822,684 pounds (58 886 579 kg) of polyethylene-type synthetic resins in September compared to a revised 66,975,800 pounds (30 379 712 kg) a year earlier.

For further information, order the September issue of *Specified Chemicals* (46-002, 15¢/\$1.50), or contact Mr. J. Dornan (613-992-0388), Manufacturing and Primary Industries Division, Statistics Canada, Ottawa K1A 0V6.

Fish Freezings and Stocks, September 1978 — Advance Information

Advance data from the *Fish Freezings and Stocks* report for the month of September are now available.

For further information, order the September issue of *Fish Freezings and Stocks* (24-001, 40¢/\$4), or contact Mr. R. Ralph (613-992-2231), Manufacturing and Primary Industries Division, Statistics Canada, Ottawa K1A 0V6.

Peeler Logs, Veneers and Plywoods, August 1978 — Advance Information

Canadian mills shipped 235,255,000 square feet (21 856 000 m²) 3/8" (9.525 mm) basis of softwood plywood in August, up from 211,406,000 square feet (19 641 000 m²) in August 1977.

Shipments of hardwood plywood amounted to 26,188,000 square feet (2 433 000 m²) surface measure for August, a decrease of 21.8% from the revised figure for the same month in 1977.

For further information, order the August issue of *Peeler Logs, Veneers and Plywoods* (35-001, 30¢/\$3), or contact Mr. P.E. Martin (613-992-2371), Manufacturing and Primary Industries Division, Statistics Canada, Ottawa K1A 0V6.

Sales of Paints, Varnishes and Lacquers, September 1978 — Advance Information

Producers' trade and industrial sales of paints, varnishes and lacquers totalled \$44,865,529 in September compared to \$39,241,628 a year earlier.

For further information, order the September issue of *Sales of Paints, Varnishes and Lacquers* (46-001, 15¢/\$1.50), or contact Mr. J. Dornan (613-992-0388), Manufacturing and Primary Industries Division, Statistics Canada, Ottawa K1A 0V6.

Fruit and Vegetable Production, November 1978 — Advance Information

This month's publication features a supplement listing a breakdown of fresh fruit sales to processors for 1977. Also included in the November issue are charts illustrating Canadian apple production and disposition for the period 1967 to 1977.

For further information on acreage, production and value of fruits and vegetables order catalogue 22-003 (40¢, \$3 for series), or contact L.A. Murphy (613-995-4877), Agriculture Division, Statistics Canada, Ottawa K1A 0L7.

Stocks of Frozen Meat Products, November 1978 (32-012, 30¢/\$3)

General Wholesale Price Index (1935-39=100), October 1978 — Advance Information

The General Wholesale Index rose 2.1% in October to 632.6 from its revised September level of 619.4. The index was 11.6% higher than in October 1977 when it stood at 567.0. The major groups having the most effect on the total index in October were wood products, vegetable products, non-ferrous metals including gold, and animal products.

The wood products index rose 2.7% due mainly to price increases of 2.0% for newsprint and wrapping paper, 12.1% for woodpulp and 3.6% for fir.

Increases of 4.6% for grains, 7.4% for sugar and its products and 3.5% for tea, coffee and cocoa were largely responsible for a rise of 2.6% in the vegetable products index.

Contributing to a rise of 5.1% for non-ferrous metals including gold were price increases of 7.5% for copper, 7.7% for silver and 14.9% for lead and its products.

The animal products index showed a rise of 2.4%, mainly reflecting increases of 4.8% for livestock and 2.8% for fish.

For further information, order the October issue of *Industry Price Indexes* (62-011, 55¢/\$5.50), or contact the Information Unit, Industrial Prices (613-995-5761), Prices Division, Statistics Canada, Ottawa K1A 0V5.

Urban Transit, October 1978 — Advance Information

In October, 56 urban transit systems collected 107,117,464 initial passenger fares. The total distance run was 33,780,321 miles (54 364 156 km) and operating revenues amounted to \$39,519,607.

For further information, contact the Chief (613-996-9271), Surface Transport Section, Transportation and Communications Division, Statistics Canada, Ottawa K1A 0T6 or order the October issue of *Urban Transit* (53-003, 15¢/\$1.50).

Canadian Farm Products Indexes (1971=100), October 1978 — Advance Information

The Canadian Farm Products Index for Canada reached 208.9 in October, an increase of 2.5% from September.

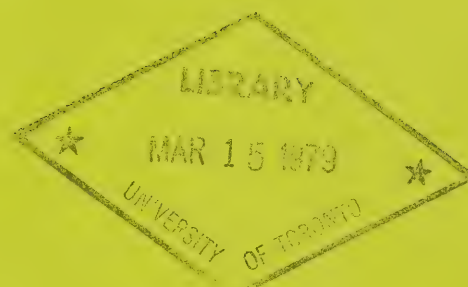

For further details, order the October issue of *Industry Price Indexes* (62-011, 55¢/\$5.50), or contact the Information Unit, Industrial Prices (613-995-5761), Prices Division, Statistics Canada, Ottawa K1A 0V5.

MONTHLY - MENSUEL

Discontinued Industrial Price Indexes

Figures published in this issue (December 1978) are final for those price indexes which have been discontinued, i.e. General Wholesale Index including the special sub-aggregations thereof; The Thirty Industrial Materials Index; The Canadian Farm Products Indexes; Index Numbers of Common and Preferred Stock Prices.

Indices discontinués des prix industriels

Les indices de prix qui sont discontinués avec cette édition (décembre 1978) sont finals, i.e. Indice général de gros y compris les sous-agrégats spéciaux suivants; Trente matériaux industriels; Indice des prix des produits agricoles canadiens; Indices des cours des actions ordinaires et privilégiées.

MONTHLY - MENSUEL

Note - NotaNotice of Revisions - Table 1

Introduced in this issue are revisions to some previously published indexes arising mainly from the incorporation of new price data. The changes are described below:

Petroleum Refineries (SIC 3651)

The replacement from February 1977, of list prices by transaction prices has resulted in significant revision to this industry index and component commodity series. The major group index has also been revised.

Indexes derived from the new price sample are presently available to June 1978 only. Price movement for the months subsequent to June 1978 has been estimated and included in the calculation of the total ISPI.

For further information, contact Aavo Kimmel (613) 995-5764.

Electrical Industrial Equipment (SIC 3360)

New price data for transformers has caused the revision of this industry and its major group, from April 1978.

Folding Carton and Set-up Boxes (2731)

Revisions to price data for folding boxes are reflected in the industry and major group indexes, from May 1978.

Food and Beverages

This major group index has been corrected for January to March 1977 inclusive, to include industry changes previously reported.

Total Industry Selling Price Index

The above revisions have been incorporated in the total index, with revised data beginning in February 1977.

For further information, contact Paul Stoochnoff (613) 995-5764.

Avis de révision - tableau 1

Cette édition comporte des révisions à des indices précédemment publiés. Ces révisions découlent principalement à l'introduction de nouvelles données de prix. Les changements sont décrits ci-dessous:

Raffineries de pétrole (CEA 3651)

Le remplacement, à compter de février 1977, des prix de liste par les prix de transaction ont entraîné une révision importante de l'indice de cette industrie et des séries des composantes. Les indices des groupes principaux ont également été révisés.

Les indices calculés d'après le nouvel échantillon de prix sont présentement disponibles jusqu'à juin 1978. Seuls les prix des mois après juin 1978 ont été estimés et inclus dans le calcul de I.P.I. total.

Pour plus de renseignements, s'adresser à Aavo Kimmel (613) 995-5764.

Fabricants d'équipement électrique industriel (CAE 3360)

Les nouvelles données de prix portant sur les transactions ont entraîné une révision de l'indice de cette industrie et de le groupe principal à compter d'avril 1978.

Fabricants de boîtes pliantes ou rigides (CAE 2731)

Une révision des données de prix pour boîtes pliantes a été effectuée pour l'indice de cette industrie et le groupe principal à compter du 19 mai.

Aliments et boissons

L'indice de ce groupe principal a été révisé pour la période de janvier 1977 à mars 1977 inclusive-ment pour tenir compte des changements précédemment relevés aux niveaux des industries.

Indice d'ensemble des prix de vente dans l'industrie

Les révisions ci-dessus ont été incorporées à l'indice total à compter de février 1977.

Pour plus de renseignements, s'adresser à Paul Stoochnoff (613) 995-5764.

Machinery and Equipment Price Indexes

Price Indexes of Construction Machinery and Equipment (1968=100) will not be published after December 1978 in 62-011 Industry Price Indexes as Table 7 but will continue to be published in 62-007 Construction Price Statistics (Monthly) for Total, Total Canadian-made and Total Imported aggregations.

The indexes remain available in full detail from CANSIM (in matrices 1787-monthly and 84-annually).

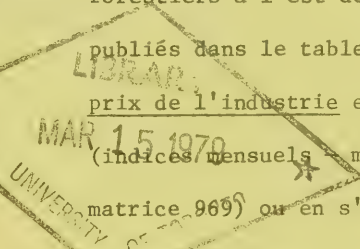

Similarly Price Indexes of Forestry Machinery and Equipment, East of the Rockies (1968=100) published in Industry Price Indexes as Table 8 may in future be obtained from CANSIM (in matrices 968 - monthly and 969 - annually) or by contacting Anton Gilham, Prices Division, Statistics Canada, Ottawa, KIA 0V5, (613) 995-5758.

Indices des prix des machines et du matériel

Les indices des prix des machines et du matériel de construction (1968=100) ne paraîtront pas après décembre 1978 au tableau 7 du bulletin 62-011, Indices des prix de l'industrie, mais le bulletin mensuel 62-007, Statistiques des prix de la construction, continuera à les publier pour l'ensemble des machines et du matériel, pour ceux qui sont fabriqués au Canada et pour ceux qui sont importés.

On pourra continuer à obtenir de CANSIM tout le détail de ces indices (indices mensuels - matrice 1787; indices annuels - matrice 84).

De même, on pourra à l'avenir obtenir les indices des prix des machines et du matériel forestiers à l'est des Rocheuses (1968=100), publiés dans le tableau 8 du bulletin Indices des prix de l'industrie en passant par CANSIM (indices mensuels - matrice 968; indices annuels - matrice 969) ou en s'adressant à Anton Gilham, Division des prix, Statistique Canada, Ottawa, KIA 0V5, (613) 995-5758.

NOTA

Le CANSIM®(Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissaient pas dans cette publication sont disponibles de CANSIM.

Le Tableau 1 (Indice des prix de vente dans l'industrie par groupes, industries et par certains produits) contient les numéros d'identification qui servent à l'extraction des données de CANSIM. Par exemple, pour obtenir l'Indice de prix de vente dans l'industrie: industries manufacturières, le numéro d'identification est D 500000.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

Chart	IV
Table	
1. Industry Selling Price Indexes by Major Groups, Industries and Selected Commodities (1971=100)	2
Major Group:	
1. Food and Beverage Industries	2
2. Tobacco Products Industries	15
3. Rubber and Plastics Products Industries	16
4. Leather Industries	19
5. Textile Industries	20
6. Knitting Mills	23
7. Clothing Industries	25
8. Wood Industries	27
9. Furniture and Fixture Industries	31
10. Paper and Allied Industries	32
12. Primary Metal Industries	38
13. Metal Fabricating Industries (Except Machinery and Transportation Equipment Industries)	41
14. Machinery Industries (Except Electrical Machinery)	43
15. Transportation Equipment Industries	46
16. Electrical Products Industries	48
17. Non-metallic Mineral Products Industries	52
18. Petroleum and Coal Products Industries	55
19. Chemical and Chemical Products Industries	56
20. Miscellaneous Manufacturing Industries	60
2. General Wholesale Indexes (1935-39=100)	64
3. Purchase Price Indexes of Industrial Materials: Secondary Metals (1971=100)	66
Thermal Coal Index (1971=100)	68
4. Canadian Farm Products Indexes (1971=100)	69
5. Feed Price Indexes, Canada and Five Geographical Regions(1)	70
6. Index Numbers of Common and Preferred Stock Prices (1971=100)	71
7. Price Indexes of Construction Machinery and Equipment (1968=100)	74
8. Price Indexes of Forestry Machinery and Equipment, East of the Rockies (1968=100)	78
9. Electric Power Selling Price Indexes (Non-residential) (1971=100)	79
Explanation of Methods Used and Additional Sources for Price Series	81

TABLE DES MATIÈRES

Graphique	IV
Tableau	
1. Indices des prix de vente dans l'industrie par groupe principal, par industries et par produits (1971=100)	2
Groupe principal:	
1. Industries des aliments et boissons	2
2. Industrie du tabac	15
3. Industrie du caoutchouc et des produits en matière plastique	16
4. Industrie du cuir	19
5. Industrie textile	20
6. Bonneterie	23
7. Industrie de l'habillement	25
8. Industrie du bois	27
9. Industrie du meuble et des articles d'ameublement	31
10. Industrie du papier et activités annexes	32
12. Première transformation des métaux	38
13. Fabrication de produits en métal (sauf machines et équipement de transport)	41
14. Fabrication de machines (sauf électriques)	43
15. Fabrication d'équipement de transport	46
16. Fabrication de produits électriques	48
17. Fabrication de produits minéraux non métalliques	52
18. Fabrication de produits du pétrole et du charbon	55
19. Industrie chimique	56
20. Industries manufacturières diverses	60
2. L'indice général de gros (1935-39=100)	64
3. Indices des prix d'achat des matériaux industriels: Métaux secondaires (1971=100)	66
Le charbon de chauffage indice	68
4. Indices des prix des produits agricoles canadiens (1971=100)	69
5. Indices des prix des aliments pour animaux, Canada et cinq régions(1)	70
6. Indices des cours des actions ordinaires et privilégiées (1971=100)	71
7. Indices des prix des machines et du matériel de construction (1968=100)	74
8. Indices des prix, des machines et du matériel forestiers à l'est des Rocheuses (1968=100)	78
9. Indices des prix de vente de l'énergie électrique (non-résidentielle) (1971=100)	79
Explication des méthodes utilisées et sources supplémentaires des séries de prix	81

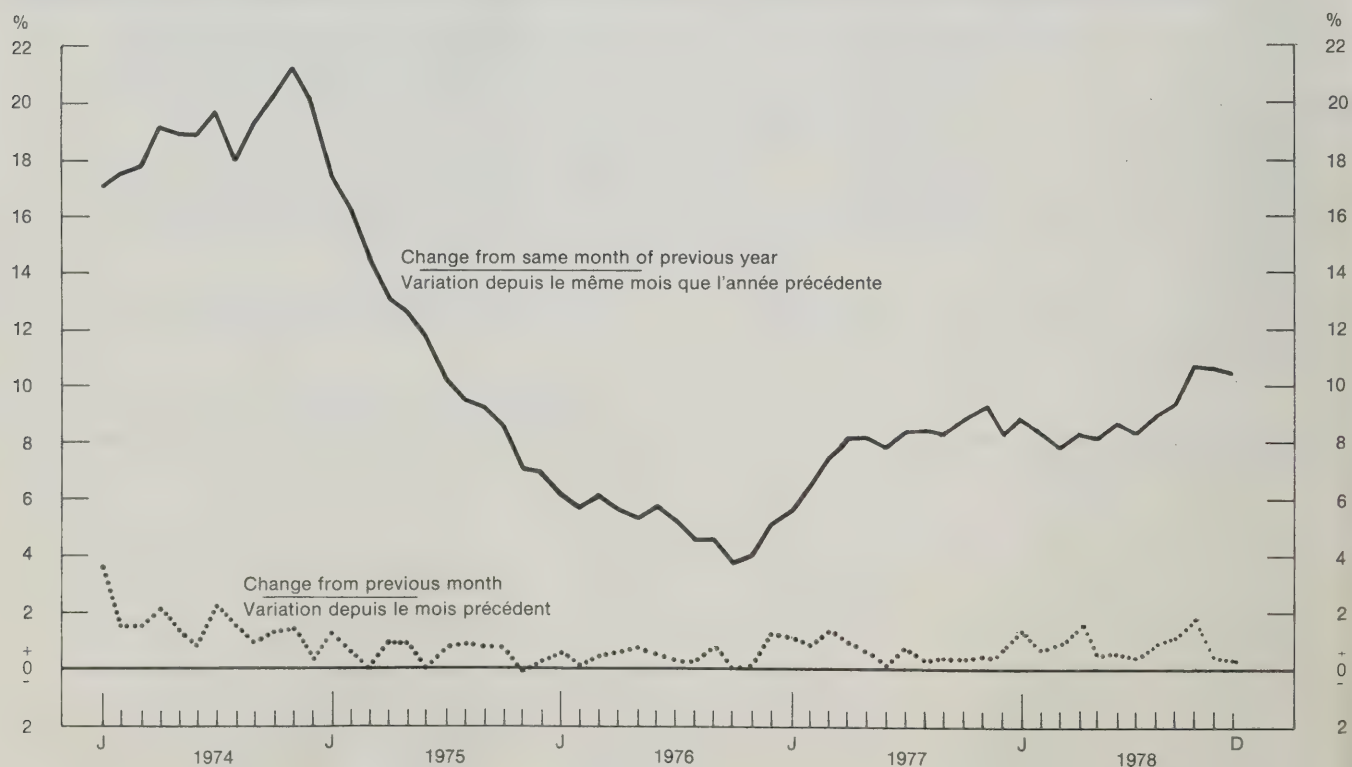

Industry Selling Price Index: Manufacturing

Indice des prix de vente dans l'industrie: industries manufacturières

Percentage Change in the Industry Selling Price Index: Manufacturing

Variation en pourcentage de l'indice des prix de vente dans l'industrie: industries manufacturières

General Wholesale Price Index,

Indice général de prix de gros,

(1935-1939 = 100)

	December	November	December	November	Percentage change	
	1978 (1)	1978 (1)	1977	1977	Variation proportionnelle	
	Décembre	Novembre	Décembre	Novembre	December-November 1978 Décembre-Novembre	December 1978/77 Décembre
General Wholesale Index - Total - Indice général de gros:	643.3	639.9	571.7	572.2	0.5	12.5
Vegetable products - Substance végétales	523.9	517.0	489.1	497.1	1.3	7.1
Animal products - Produits animaux	727.9	721.9	610.1	597.9	0.8	19.3
Textile products - Produits textiles	523.8	522.3	471.0	471.6	0.3	11.2
Wood products - Produits du bois	944.3	943.8	821.0	821.2	0.1	15.0
Iron products - Produits du fer	677.9	676.8	612.3	612.4	0.2	10.7
Non-ferrous metals including gold - Métaux non ferreux y compris l'or	581.0	577.5	496.5	502.4	0.6	17.0
Non-metallic minerals - Minéraux non métalliques	515.0	515.3	492.4	493.6	- 0.1	4.6
Chemical products - Produits chimiques	451.6	448.8	412.5	410.0	0.6	9.5
Iron products and non-ferrous metals excluding gold - Produits du fer et métaux non ferreux moins l'or	748.8	747.8	660.7	664.2	0.1	13.3
Raw and partly manufactured goods - Matières pre- mières et demi-produits	601.7	595.3	522.5	530.7	1.1	15.1
Fully and chiefly manufactured goods - Produits finis ou presque finis	664.9	663.3	597.8	593.9	0.2	11.2

(1) These indexes are preliminary. - Ces indices sont provisoires.

(1) Indexes from June 1978 are subject to revision. — Les indices à compter de juin 1978 sont sujets à révision.

(2) Composed of Iron Products and Non-ferrous metals groups from the General Wholesale Index, covering raw and partly as well as fully and chiefly manufactured goods. — Renferme les produits du fer et les groupes de métaux non ferreux de l'indice général de gros, comprenant des matières premières et des produits partiellement ou entièrement fabriqués et les produits destinés principalement à la fabrication.

(3) The weighted average of these two series is the total General Wholesale Index. — La moyenne pondérée de ces deux séries représente tout l'indice général de gros.

(4) Excludes metals in the form of pig, ingot, scrap, cast and electrolytic. — Ne comprend pas les métaux sous forme de gueuses, lingots, ferraille, et moulages et les métaux électrolytiques.

(5) Includes rolled and formed products such as sheets, plates and pipes. — Comprend les produits laminés et façonnés comme les feuilles, les plaques et les tuyaux.

(6) Includes vegetable and animal products groups, less hay, rubber, tobacco, furs, hides and skins, leather and footwear. — Comprend les groupes de produits d'origine végétale et animale moins le foin, le caoutchouc, le tabac, les fourrures, les peaux, le cuir et les chaussures.

(7) All items except vegetable and animal products groups. — Tous les articles moins les groupes de produits d'origine végétale et animale.

(1) With the revision of the Farm Input Price Index to a 1971=100 base, the source of feed prices has been changed. The Canadian Livestock Feed Board now provides the price data; to supplement this information, we now publish price indexes (1971=100) instead of average prices. — La source des prix des provendes a été changée avec l'introduction de la révision de l'indice des prix des entrées dans l'agriculture sur la base de 1971=100. Les prix proviennent maintenant de l'office canadien des provendes. Nous publions maintenant des indices de prix (1971=100) au lieu de prix moyens comme complément à cette information.

(1) Monthly prices are collected and processed three times per annum. With the release of the most current four-months indexes, indexes for the previous four-month span are revised and finalized. — Des prix mensuels sont relevés et calculés trois fois par année. Avec l'émission des indices les plus récents portant sur quatre mois, les indices pour la période de quatre mois précédents sont révisés et finalisés.

EXPLANATION OF METHODS USED AND ADDITIONAL
SOURCES FOR INDUSTRIAL PRICE INDEXES

Industry Selling Price Indexes
(1971=100)

Industry selling price indexes are published for approximately 110 industries within manufacturing. Also published are approximately 700 commodity price indexes for the products of these industries. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction data for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry selling price indexes: manufacturing 1956-1976, Catalogue 62-543 for the 1971=100 based indexes.

General Wholesale Index
(1935-1939=100)

The general wholesale index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES
SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indices des prix de vente dans l'industrie
(1971=100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Près de 700 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices figure dans l'industrie: industries manufacturières, 1956-1976 n° 62-543 au catalogue pour les indices basés sur l'année repère 1971=100.

Indice général des prix de gros
(1935-1939=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène

broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except insofar as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Volume 23) (Catalogue 62-501).

Thirty Industrial Materials (1935-1939=100)

The price index of 30 industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{\frac{p_1}{tN} \times \frac{p_2}{tN} \times \frac{p_3}{tN} \times \dots \times \frac{p_{30}}{tN}}$$

de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter Wholesale Price Indexes 1913-50 (Reference Paper No. 24) et Prices and Price Indexes 1949-52 (volume 23) (n° 62-501 au catalogue).

Indice des prix de 30 matières industrielles (1935-1939=100)

L'indice des prix de 30 matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering five and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyres type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

Purchase Price Indexes of
Industrial Materials

Secondary Metals (1971=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Thermal Coal Purchase Price Index
(1971=100)

This index on a 1971=100 base is the result of a renewed demand for coal because of an anticipated shortage in energy supplies. The index for coal is a purchase price index determined by surveying electric utilities, the major users of bituminous coal. It includes purchase prices for both domestic and imported United States coal. Prices are the amount the utilities pay to suppliers, excluding federal and provincial taxes and freight rates. The weights in this index are derived from the base year purchase prices provided by the firms.

The "Thermal Coal Purchase Price Index" is calculated using the modified Laspeyres' fixed weight formula:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Where

$P_{t/o}$ is the price index (expressed as a percentage) which compares prices of the given year t with those of the base year o (1956, 1961 and 1971 respectively),

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables" (12 matières), prix des aliments (cinq matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérés comme intrants importants dans l'industrie.

Indices du prix d'achat des
matériaux industriels

Métaux secondaires (1971=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la Statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice du prix d'achat du charbon thermique
(1971=100)

Cet indice de base 1971=100 a été établi à la suite d'une nouvelle demande de charbon à cause d'une pénurie prévue en ressources énergétiques. L'indice du charbon est un indice du prix d'achat payé par les services publics d'électricité, principaux utilisateurs de charbon bitumineux. Il comprend à la fois le prix d'achat du charbon domestique et du charbon importé des États-Unis. Les prix sont ceux payés aux fournisseurs, sans les taxes fédérales et provinciales et les taux de fret. Les coefficients de pondération sont calculés à partir du prix d'achat de l'année de base fournis par les entreprises.

L'"indice du prix d'achat du charbon thermique" est établi à l'aide de l'équation modifiée de Laspeyres à pondération fixe:

$$P_{t/o} = \frac{\sum \frac{P_t}{P_o} V_o}{\sum V_o} \times 100$$

Où

$P_{t/o}$ est l'indice (exprimé en pourcentage) des prix d'une année donnée t sur ceux de l'année de base o (1956, 1961 et 1971 respectivement),

\sum is the sign indicating the summation over all items contained in the index,

P_t is the price of a particular item in the given period t.

P_o is the price of a particular item in the base year o.

V_o is the fixed weight of a particular item in the base year o.

$\frac{P_t}{P_o}$ is the price ratio for a particular item(1) (expressed as a percentage) between the given period t and the base year o.

\sum est le symbole qui indique la somme de tous les articles de l'indice,

P_t est le prix d'un article particulier pendant la période donnée t,

P_o est le prix d'un article particulier pendant l'année de base o,

V_o est le coefficient de pondération fixe d'un article particulier pendant l'année de base O,

$\frac{P_t}{P_o}$ est le rapport (exprimé en pourcentage) du prix d'un article particulier(1) entre la période donnée t et l'année de base o.

Indexes for establishment and provincial levels cannot be published because of the confidentiality of the data under the Statistics Act.

Les indices aux niveaux de l'établissement et de la province ne peuvent être publiés puisque la confidentialité des données doit être assurée en vertu de la Loi sur la statistique.

Canadian Farm Products Price Index (1971=100)

This index on a 1971=100 base is an up-dated version of that previously published on a 1935-1939=100 base. The weighting system is derived from the 1971 Farm Cash Receipts as collected by the Agriculture Division of Statistics Canada. The receipts measure the value of farm production less inter-farm payments and income-in-kind. Prices are obtained from terminal markets.

The Canadian Wheat Board announced final payments for the crop year 1976-77 on January 5, 1978 and the index includes them. The estimates for the total payments for 1977-78 are the initial payments plus a half of the 1976-77 crop year payments.

The indexes for 1978-79 are based on initial payments only.

Indice des prix des produits agricoles canadiens (1971=100)

Cet indice, qui se fonde sur l'année de base (1971=100) constitue une mise à jour de l'indice antérieur établi sur la base 1935-1939=100. Le système de pondération est tiré des recettes monétaires agricoles de 1971 qui ont été recueillies par la Division de l'agriculture de Statistique Canada. Ces recettes indiquent la valeur de la production agricole moins les paiements entre agriculteurs et les revenus en nature. Les prix proviennent des marchés terminaux.

La Commission canadienne du blé a annoncé les paiements finals de l'année de récolte 1976-77 le 5 janvier 1978 et l'indice en tient compte. Les estimés des paiements totaux pour 1977-78 couvrent les paiements initiaux et la moitié des paiements de l'année de récolte 1976-77.

Les indices pour 1978-79 sont basés sur le premier paiement seulement.

Unit — Unité	Initial and total participation payments 1976-77, 1977-78, 1978-79

Security Price Indexes (1971=100)

Revised security price indexes on the base 1971=100 were presented for the first time in the May 1975 issue of Catalogue 62-002. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily

Indices des cours des valeurs mobilières (1971=100)

Les indices révisés des cours des valeurs mobilières sur la base 1971=100 ont été présentés pour la première fois dans le n° 62-002 au catalogue, mai 1975. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1^{er} janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de

closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-74.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

For the list of stocks currently included in the indexes, see the special supplement in the May 1975 issue of Prices and Price Indexes (Catalogue 62-002).

Price Indexes of Machinery and Equipment (1968=100)

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-74.

Les actions faisant partie des indices sont classés selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Pour la liste des actions habituellement comprises dans les indices, consulter le supplément spécial dans l'édition de mai 1975 de la publication Prix et indices des prix (no 62-002 au catalogue).

Indices des prix des machines et du matériel (1968=100)

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminée pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Electric Power Selling Price Indexes (Non-Residential)

1. Brief Description

The Electric Power Selling Price Indexes are designed to measure "pure" price change at the producers' level, i.e., at the "factory gate". Since the industry's transmission lines are considered as part of the producer's operation, the "factory gate" in this index is at the user's end. These indexes are part of a larger system of indexes known as the Industry Selling Price Indexes and conform to the underlying concepts as described in reference document, Catalogue 62-543.

Industry Selling Price Indexes are a measure of pure price change of specified commodities having a fixed time and weight base of 1971=100. Prices are f.o.b. factory gate less discounts and before taxes. The 1971 Gross Shipment Values are gathered by the Census of Manufacturers. In the case of Electric Power Selling Price Indexes, weights are based on the 1971 revenue from electricity sales gathered by Prices Division.

The Electric Power Selling Price Index series is published in two broad customer categories of sales, (1) an index for bills less than 5000 kw. and (2) an index for large industrial sales, bills or contracts 5000 kw. and over. Data are presented from 1971 onward, on a monthly basis. Only firm (non-interruptible) power is being surveyed. Interruptible and off-peak power price movement is not included in this index. The survey methodology is described under each of the two broad customer categories.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

Indices des prix de vente de l'énergie électrique (non résidentielle)

1. Brève description

Les indices des prix de vente de l'énergie électrique visent à mesurer la variation de prix "pure" au niveau de la production, c'est-à-dire, au "départ de l'usine". Étant donné que les lignes de transport de l'entreprise font ici partie de l'exploitation du producteur, le présent indice prend comme point de "départ de l'usine" l'entrée chez l'utilisateur. Ces indices appartiennent à un plus grand système d'indices appelé Indices de prix de vente dans l'industrie et s'appuient sur les concepts décrits dans le document de référence qui doit paraître bientôt (n° 62-543 au catalogue).

Les indices de prix de vente dans l'industrie mesurent la variation de prix pure de certains produits ayant une base fixe de période et de pondération (1971=100). Il s'agit des prix f.o.b. départ usine moins les remises et avant impôt. Les valeurs des livraisons brutes sont recueillies par le recensement des manufactures. Dans le cas de l'indice des prix de vente de l'énergie électrique, les pondérations sont basées sur les recettes au titre des ventes de 1971, dont les données ont été recueillies par la Division des prix.

L'indice des prix de vente de l'énergie électrique paraît pour deux grandes catégories de ventes selon le client, à savoir: (1) un indice pour les factures de moins de 5000 kW et (2) un indice pour les ventes, factures ou contrats industriels de 5000 kW et plus. Nous publions ces données chaque mois depuis 1971. Seule l'énergie garantie, non susceptible d'être interrompue fait l'objet du relevé, les mouvements de prix de l'énergie susceptible d'être interrompue et de l'énergie des heures creuses n'étant pas compris dans l'indice. Les méthodes d'enquête figurent sous chacune des deux grandes catégories.

Whenever specification changes occur thereby altering the quality of the item being priced, quality change evaluations are made to ascertain only pure price change since the commodity characteristics must remain constant in order to measure pure price change over a given period of time, using Laspeyres formula as follows:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = index for year t

Pt = price of an item in the given period

Po = price of an item in year o, the base year

Vo = weight of an item in the base period

Pt/Po = is the price ratio for a particular item.

Toutes les fois qu'il se produit une variation de la qualité du produit relevé, on procède à une évaluation de la variation de la qualité afin de s'assurer que seule la variation de prix pure est prise en compte, puisque les caractéristiques du produit doivent demeurer constantes si l'on veut mesurer une variation de prix pure sur une période donnée. On se sert de Laspeyres de la façon suivante:

$$Pt/o = \frac{\sum \frac{Pt}{Po} \times Vo}{\sum Vo} \times 100$$

Pt/o = indice pour l'année "t"

Pt = prix d'un article particulier pendant une période donnée

Po = prix d'un article particulier pendant l'année "o", année de base

Vo = coefficient de pondération d'un article pendant la période de base

Pt/Po = ratio des prix pour un article particulier.

2. Methodology

(a) Bills Less Than 5000 kw.

In this category a "representative bill" was selected subjectively through examination of the bills in each of the municipalities drawn in our provincial samples. Some 120 municipalities were surveyed in the sample and the municipalities selected represent a good coverage of each province in terms of sales. The representative bill was established and its kw. demand and kwh. consumption specifications will be held constant until it is found, on periodic review, that the bill is no longer representative of the monthly bills in that municipality. When this occurs a new representative bill will be selected and its price "spliced in" to the original bill to maintain the continuity of the index. Larger municipalities may have more than one representative bill where several significant groupings of bills have been identified. All provinces are included in the survey.

(b) Bills 5000 kw. and Over

This customer category presented problems in sampling. The category is composed of customers whose contract prices do not necessarily move as a family of curves. In many cases larger contracts are given a different price adjustment by utilities, than the lesser ones. In order to eliminate this sampling problem, a stratified sampling technique was used whereby homogeneous

2. Méthodologie

a) Factures de moins de 5000 kW

Dans cette catégorie une "facture représentative" a été choisie subjectivement parmi les factures de chacune des municipalités tirées de nos échantillons provinciaux. Les quelque 120 municipalités de l'échantillon sont représentatives des ventes effectuées dans chaque province. À la facture choisie sont attribuées des caractéristiques, c'est-à-dire la demande en kW et la consommation en KWh, que l'on conserve jusqu'à ce que, après un examen périodique, on estime que la facture ne représente plus le prix mensuel des factures de cette municipalité. Dans ce cas, une nouvelle facture représentative est choisie et son prix est "ajusté" d'après la facture originale pour ne pas créer une discontinuité dans la série. Les grandes municipalités peuvent avoir plus d'une facture représentative lorsque plusieurs groupements de factures ont été établis. Toutes les provinces sont visées par l'enquête.

b) Factures de 5000 kW et plus

Cette catégorie de clients présente certains problèmes d'échantillonnage; elle se compose dans son ensemble de clients pour lesquels les mouvements des prix des contrats ne vont pas nécessairement dans le même sens. Dans de nombreux cas, les gros contrats font l'objet d'un rajustement de prix par service, différent de celui des petits contrats. Afin d'éliminer ce problème, on a utilisé une technique d'échantillonnage stratifié pour établir

groups or strata were established and a representative contract was selected subjectively for each interval or stratum, e.g., 5000-8000 kw., 8001-10,000 kw., 10,001-15,000 kw., 15,001-20,000 kw., and over 20,000 kw. (the specifications used may be theoretical in order to respect the confidentiality of a respondent). Interval boundaries and their representative contracts are held constant through time for each utility. These interval boundaries differ between utilities since each one has a different customer category make-up. The actual index of the "5000 kw. and over" category is a weighted average of the price movements for each interval or stratum within that group. Each interval is weighted according to the utility's revenue from sales for 1971. It is recognized that in the larger utilities the establishment of homogeneous groups of contracts in terms of price movement, especially in the contracts 15,000 kw. and over, may not be possible. Consequently, as an alternative, utilities may calculate a weighted average unit price in each of the intervals of strata that are not homogeneous and apply this price movement to a theoretical representative contract. In this way distortions will be minimized and at the total index levels will be averaged out.

3. Individual indexes are calculated for the province, economic region and at the national level for each of the two broad customer categories described above. The five economic regions are as follows: Pacific (British Columbia), Prairie (Alberta, Saskatchewan and Manitoba), Ontario, Québec and Atlantic (Newfoundland, New Brunswick, Prince Edward Island and Nova Scotia).

Users are cautioned that the indexes indicate only price movement variations and should not be interpreted as representative of individual utilities relative price levels.

des groupes ou strates homogènes et choisir subjectivement un contrat représentatif (dont les caractéristiques peuvent être "théoriques" de façon à garder secrets les chiffres d'un enquête) pour chaque intervalle ou strate, par ex., 5000-8000 kW, 8001-10,000 kW, 10,001-15,000 kW, 15,001-20,000 kW et plus de 20,000 kW. Ces limites et leurs contrats représentatifs sont tenus constants dans le temps pour chaque service public. Ces limites ne sont pas les mêmes pour chaque service puisque chacun regroupe des clients différents. L'indice réel pour les factures de 5000 kW et plus est une moyenne pondérée des mouvements de prix pour chaque intervalle ou strate de chaque groupe, chaque intervalle étant pondéré selon les recettes de ce service au titre des ventes de 1971. On sait pertinemment que pour les grands services, l'établissement de groupes de contrats homogènes en termes de mouvement de prix, surtout les contrats de 15,000 kW et plus, peut être impossible; par conséquent, comme solution de rechange, les services peuvent calculer un prix unitaire moyen pondéré pour chaque intervalle ou strate non homogène et appliquer cette variation de prix à un contrat représentatif théorique. De la sorte, les distorsions seront maintenues à un minimum et s'équilibreront aux niveaux de l'indice total.

3. Chaque indice est calculé selon la province, la région économique et le Canada pour chacune des deux grandes catégories de clients décrites ci-haut. Les cinq régions économiques sont: le Pacifique (Colombie-Britannique), les Prairies (Alberta, Saskatchewan et Manitoba), l'Ontario, le Québec, l'Atlantique (Terre-Neuve, Nouveau-Brunswick, Île-du-Prince-Édouard et Nouvelle-Écosse).

Les utilisateurs sont priés de noter que les indices rendent compte des variations des mouvements des prix seulement et qu'il ne faut pas les considérer comme représentatifs des niveaux relatifs des prix des divers services.
